A reliable gasket in one minute.

Permatex[®]

“THE REPLACEMENT GASKET CHALLENGE”

With cars in service longer and new models arriving every year, gasket replacement has brought its share of headaches to today's automotive technician.

- Difficulty in matching new gaskets with older parts
- New and difficult-to-seal surfaces are more common
- Locating the right replacement gasket can be time

Gaskets to Fit Any Application...Instantly

The Right Stuff® is Permatex' premier instant gasket maker. Designed as a replacement for conventional gaskets, this elastomeric “formed-in-place” material is more reliable and longer lasting than pre-cut gaskets.

Just Torque & Go!

The Right Stuff® seals instantly, allowing equipment to return to service immediately. No more searching for the right pre-cut gasket or waiting for a gasket to be delivered. The Right Stuff® makes any size or shape gasket instantly and easily fits a variety of applications.

Blowout resistant, the Right Stuff® protects against leaks and seepage that result from vibration and thermal expansion. It also resists aging, weathering and thermal cycling without hardening, shrinking or cracking.

EASY-TO-USE DIRECTIONS:

- Clean and dry parts.
 - Apply a continuous bead of the Right Stuff®.
 - Surround all bolt holes.
 - Assemble parts within 5 minutes of applying the Right Stuff®.
- No waiting for cure time!**

In addition to having superior bonding properties, the Right Stuff® is resistant to transmission fluid, coolant, oil and other common shop fluids, and maintains those attributes in continuous conditions ranging from -75°F to 450°F (-60°C to 232°C), and intermittently up to 500°F (260°C).

Rigorous Testing Without Failure!

The Right Stuff® has been used in vehicle fleets nationwide across a range of operating conditions and has demonstrated leak-free performance in more than 5 million miles of heavy commercial testing. Its 0% failure rate reinforces its superiority to OE gaskets.

Using the Right Stuff® Instant Gasket means doing the job right the first time.

Typical Applications

- Valve Covers
- Oil Pans
- Thermostat Housings
- Transmission Pans
- Water Pumps
- Rear End Covers
- OHC Cap
- Timing Covers
- Gearboxes
- Intake End Seals
- Side Cover Plate
- Rear Main Bearing Split Line
- Gear Selector Mechanisms
- Rear Axle Housings
- Transmissions
- Gear Changes
- Gearbox Casings
- Differential Assembly to Rear
- Differential Power Dividers
- Compressors
- Stamped Sheet Metal Covers

the Right Stuff® GREY Gasket

In addition to the standard Black formula, the Right Stuff® is also available in a Grey formula that is especially suited to perform under the high torque loads and more closely spaced bolt patterns found in imports.

Easy-to-Use Package

Not only is the Right Stuff® a superior gasketing formula, it comes in various packaging options that make it easy to use for your specific application.

Benefits of using the Right Stuff®

- Suitability for various applications
- Seals instantly
- Returns equipment to service faster
- Resistant to ATF, coolant, oil and other shop fluids
- OEM specified
- Fleet tested
- Sensor-safe

OEM Specified & Approved

The Right Stuff® was formulated to meet or exceed performance standards for long-term sealability, durability and handling. The result was a material that is so reliable that it is used on OEM production lines and specified in their service parts programs.
