API Q1 Technical Application for Lead Auditor

Program Overview

This course provides participants with an in-depth understanding, knowledge, and skills needed to carry out successful internal and external API Q1 audits. The latest methodologies, practices, and techniques are utilized including practical application for manufacturing and the global supply chain that supports the petroleum and natural gas industry.

This course utilizes the latest training methodologies and uses a combination of lecture, examination, and group auditing to ensure each participant is able to analyze properly, audit, document, and report findings, concerns, and observations. This course covers all of the technical requirements outlined in the specification. This course is the first in the industry that consist of conducting a full API Q1 audit, against a fully documented QMS and records management system. Throughout the audit, participants undergo observations and receive competency assessments by accredited providers and subject matter experts. Upon completion, you will earn the designation of API Q1 Lead Auditor, receive a certification with a unique registration number issued by WPAG and be listed in the Industry Registered Professional Network™.

Summary of Course Curriculum

- Auditing manufacturing & their global supply chain
- How to audit the controls outlined in the API Q1 Specification, 9th edition
- Auditing preparation, performance, reporting, and follow-up
- Conducting a full Audit on Section 4.0, 5.0 and 6.0 of the Specification
- Auditor competencies, responsibilities and accountabilities

Who Should Attend

Operators, manufactures, industry suppliers, 3rd party auditors, and consultants who support the manufacturing and the global supply chain in the petroleum and natural gas industry. This program is designed for quality, HSE, and operational personnel. If a part of your job includes ensuring processes, products, management system requirements, contract or API standards are implemented in a sustainable manner, this course is for you.

This course is utilized by the international, national and state owned oil companies for both training and to obtain a baseline competency assessment by an accredited provider.
