REF: REBUILDING

I plan on rebuilding my 40 wide x 60 long and adding 1 extra truck bay 20FT to my Equipment & truck garage after the fire on December 19,2021.

In this fire we lost 3 trucks and all of our tools ect... We finally settled with the Insurance Companies On March 4, 2022.

Per my sketch enclosed, I am hoping to start rebuilding March 21st 2022.

Because this building is in a Flood plain and had been built on a concrete slab; We plan on building the new building which will be 60' X 60' X 16' on a concrete Frost wall app. 30" out of the ground and raising the new concrete slab ap. 24" above the old concrete Slab to prevent the interior of the building from having to deal with Any further water coming into the interior of the new building.

Since I purchased the building in 2017 we have had to deal with 24+ inches of water inside The building 4 times.

Everything per the above will remain virtually the same.

I've retained a building contractor Northeast Frame to Finish (Gene Webster) to do the Rebuilding to start by April 11,2022 So we can get back to work ASAP.

Thanks
Real
