Specializing in Disaster Recovery and Business Continuity Preparedness
from Boutique Recovery Strategies to Enterprise-wide Solutions

The Enterprise Readiness Assessment

Providers today deliver solid technical solutions; yet face challenges gathering business requirements to better understand and fully meet a customer's Disaster Recovery and Business Continuity (BC/DR) needs.
A Business Impact Analysis or other assessment form may not fully identify an organization's BC/DR Program Readiness.

Disaster Readiness Solutions (DRS) delivers a single integrated product to analyze and determine your organization's BC/DR Program Preparedness; the *Enterprise Readiness Assessment (ERA)*.

Benefits

- Evaluate your BC/DR Program for Strengths, Gaps and Staff Readiness.
- Identify Critical Systems, Business Processes, and Points of Failure.
- Determine Risk Exposure, Security Concerns, and Regulatory Compliance.
- Examine Office and Staff Mobility (Workstations, Phones, and Peripherals).
- Analyze Technical Readiness in a Disaster
    - Storage, Backup/Recovery
    - Server Virtualization
    - Network Bandwidth
- Develop Action Plans and recommendations to improve your BC/DR Program.

The *ERA* is *affordable*. The total assessment can be completed in two weeks.

The *ERA* is *scalable*. All or part of the assessment can be performed and be delivered as a Stand-Alone Product, or used to form the foundation to grow and develop your entire BC/DR Program.

Everything Starts with a Plan –
The Readiness Program from DRS

The Readiness Program by DRS delivers an integrated process that grows and evolves with you.

From Program Planning to Development and Deployment to Testing and Review, each step of The Readiness Program model follows a standardized format that feeds into the other program components; allowing your BC/DR program to grow organically and develop in a uniformed manner.
