

# Can You Spot The Serious Back Problem On This MRI?

Do you see it? It's called a herniated disc, a painful condition that can cause severe sciatic nerve pain. And now you can hopefully knock out this painful problem – with a new non-surgical and drugless spinal breakthrough. If you, or loved one, suffers from disc herniation, bulging disc, sciatica, neck or back pain your must read these facts.

Low back pain can be a terrible experience.

You might not be able to work, play, or even sit for 30-minutes on a chair or bench. It feels impossible for anyone around you to understand how bad you feel. You can't remember the last time you even had a good restful night's sleep.

Nothing is worse than feeling great mentally, but physically feeling held back from life because your back or leg hurts and the pain just won't go away even with all the things you've tried.

My name is Dr. Greg Millar, founder of the **Alabama Laser Spine Foundation**. You've probably seen me and my Doctors over the years on WAAY TV Channel 31 Medline or Backtalk shows answering questions.

## Do You Have Any of the Following Conditions?

- **Sciatica - Pain down your leg**
- **Lower Back Pain**
- **Herniated/Bulging/Prolapsed/Degenerative discs**
- **SI Joint and Hip Pain radiating from the back**
- **Muscle spasm in the back or legs**
- **Weakness in a leg – feels like it could go out**

Fortunately, if you are suffering from any of these problems, they may be relieved or eliminated by Laser Assisted Spinal Decompression Therapy treatments using the LADR Protocol now available for the first time right here in Huntsville. You've heard about Lasers treating back pain, now it's your time to check it out and see if they will work for YOU.

## No Dangerous Drugs, No Invasive Procedures, and No Painful Exercises

Non-Surgical Laser Assisted Spinal Decompression Therapy treatments are very gentle. You'll simply lie on your stomach or back, whichever is comfortable, and then a specialized belt is gently put around your waist. We'll set the machine to focus on your problem area – then the on-board advanced computer system will do the rest. In fact, every once and awhile I even catch a patient sleeping during sessions.

Then we treat your pain and inflammation with a non-burning Class IV Laser on your Neck or Low Back. Even if you have had decompression traction before this is different...very different. Our decompression traction treats the mechanical compression (ie. disc on a nerve) while our laser treats the chemical inflammation and pain.

The conditions this amazing treatment has proven successful with are:

- **Herniated and/or bulging discs**
- **Degenerative disc disease**
- **Stenosis**
- **Sciatica – pain down the leg**
- **Pain or failure following certain back surgeries**

Together they open an entire new world of treatment for neck and low back pain sufferers.

Many Doctors and researchers now feel that the chemical inflammatory molecule TNF may be the cause of most back pain not caused by mechanical compression. Our 25 watt peak power Laser treats this TNF inflammation molecule. The combination of Laser and Decompression is called – Laser Assisted Decompression Traction Therapy and the key is using the LADR Protocol. (Pronounced "ladder")

## "What's The Chances This Will Work For Me?"

*One clinical study has shown non-surgical spinal decompression therapy to be extremely successful (good or excellent relief) in ±86% of patients with herniated discs and degenerative joint disease –*

*Study after study have shown that Laser therapy stimulates healing of deeper structures such as nerves, tendons, and cartilage. (Gigo-Benato et al. 2004) (Fillipin et al. 2005) (Morrone et al. 2000).*

*Studies also show that Laser therapy can reduce pain, inflammation and swelling caused by injuries and degenerative diseases. (Bjoridal et al. 2006) (Carati et al. 2003) And lasers specifically act on the TNF inflammation molecule. (Aimbire et al. 2006)*

Spinal decompression by itself has a high success rate with disc herniations, bulges, stenosis, sciatica, and neck and low back pain. Add to that success, laser assisted therapy and the results demand a "must try." Yes, results vary but we have been very impressed. In just a matter of weeks you could get your life back again and be back to your old self.

## The Single Most Important Solution To Your Sciatica and Back Pain

If you've been hearing about spinal decompression, or spinal lasers and always wanted to check it out and see what it can do for you, now is the best time.

For August only, you will get for Free\* all the services I normally charge new patients \$250.

## What does this offer include? Take a Look:

- Free\* Seminar Talk to learn about Laser Assisted Spinal Decompression treatments using the LADR Protocol;
- A Free\* consultation/meeting about your problem where I will listen...really listen...to the details of your case and then offer solutions if I can help you;
- A Free\* complete neuromuscular examination;
- If possible, I will determine what spinal problem(s) are contributing to your pain/symptoms.
- A thorough analysis of your current MRI's, CT scans and x-rays (new imaging not included)
- A Report of Findings where I go over your findings so we can start mapping out your plan to being pain free (if we think we can help you).
- You'll get to see everything first hand and find out if this amazing treatment will be *your* pain solution, like it has been for so many other patients.

Call today...**Phone 256-539-1000** Seminar seating limited to 10 per seminar with RSVP.

## What Will Your Pain Feel Like in a Month?

Let's face it, if the pain hasn't gone away by now, it's not likely to go away on its own. We want to be very honest with you. If we think we can help you, we will accept you as a patient. If we don't think we can help you, we will try to refer you to someone that can help. Fair Enough?

Call Now and tell the receptionist you'd like to book the Free\* Seminar talk and then come in for the Special Laser Decompression Evaluation before this offer expires.

After the Free\* Seminar talk then we can get started with your Special Laser Decompression Evaluation as soon as there's an opening in the schedule. Our office is called **Alabama Laser Spine Foundation**. We are located in the medical district downtown Huntsville, at 303 Williams Ave SW, Suite 114, Huntsville 35801.

We look forward to hopefully helping you get rid of your pain so you can start living life again.

Sincerely,

**Dr. Greg Millar, DC CCEP**

**P.S.** Life's too short to live in pain like this. Call today and hopefully soon we'll be giving you the green light to have fun again. Phone **256-539-1000**
