

SolarCozi 10W

Solar Powered Attic Vent
Model: GTI/10WA-8ALM

SPECIFICATIONS

- Shell** High impact resistance ABS plastic
- Features** 10 W PV panel, 8" Aluminium blade, Thermostat O/F at 86°F ± 5°F
- Motor** 12V DC auto inverted brushless motor Aluminium motor shell
- Exhaust** 750 CFM
- Dim** 17.7" X 17.7" X 5.55"
- Weight** 4.5 lb

SolarCozi 10W

WARNING

- ☛ Some edges of the solar vent are sharp. Wear safety gloves to avoid injury when handling.
- ☛ When cutting or drilling into wall or ceiling, do not damage electrical wiring and other hidden utilities.
- ☛ To reduce risk of injury, cover the solar panel with cardboard. The fan operates when the solar panel is exposed to sun light.

RECOMMENDED INSTALLATION INSTRUCTIONS

1. Tools and materials required:

Drill, Pencil, Tape Measure, Sabre Saw, Hammer, Pry Bar, Roofing Cement, Galvanized Roofing Nails.

2. Check your roof orientation and decide the location that has the best sun exposure.

It is recommended south, southwest or west side of the house.

3. Inside your attic find the vent location. Indicate the install place halfway between rafters and drill a guide hole through the roof.

4. At the roof side, with a nail and string, scribe 12" diameter circle on the shingles.

SolarCozi 10W

- 5. Cut shingles inside of the circle.
- 6. Drill start hole on inside the 12" circle and cut off roof boards inside of the line.
- 7. Remove shingle nails around.
- 8. Apply roofing cement on the bottom side of the vent. Start 2/3 from the top of the square and slide the vent under the shingles.

Check and align the vent base with the roof hole.
- 9. Lift the shingles and nail or screw the vent base to the roof.
- 10. Seal shingles and nails with roofing cement.

SolarCozi 10W

Warranty
