High Performance Cutting Tools

At HELION we have been providing solutions in the machining field for more than 60 years. We are specialist in cutting tools, and as we say, we are successful when our partners are successful. Our target is to optimize machining operations of our customers in order to increase their productivity by reducing machining times.

At HELION we have highly qualified technical staff, which enables us to offer what we call the integral solution: we first understand your need; we provide you the required product and make sure it works. For whatever is your need, technical and commercial advising is at your disposal. We keep innovating thanks to the ongoing formation of your engineers as well as our attendance at the most notorious international exhibitions in the field.

Another advantage of HELION is the large stock of products we keep at your disposal, ready for immediate shipment, thus preventing our clients from having to keep their own stocks.

We have a Quality/Price ratio that make us really competitive, just order some tools for test purposes and you will see the result.

If you have any question, please do call us. We are here to serve you!

Herramientas de corte de alto rendimiento

En HELION proporcionamos soluciones en el campo del mecanizado desde hace más de 60 años. Somos especialistas en herramientas de corte, y como solemos decir, "Nuestro éxito reside en el éxito de nuestros clientes". Nuestro objetivo es optimizar las operaciones de mecanizado de nuestros clientes con el fin de aumentar su productividad mediante la reducción de los tiempos de mecanizado.

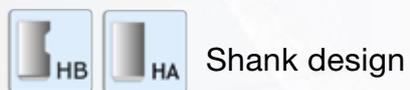

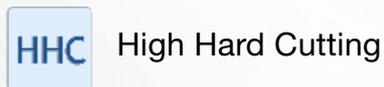

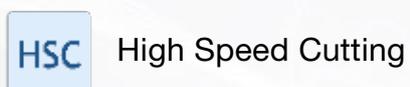

En HELION contamos con personal técnico altamente cualificado, lo que nos permite ofrecer lo que llamamos una solución integral: en primer lugar, entendemos su necesidad, ponemos a su disposición el producto requerido y nos aseguramos de que funciona. Por muy grande que sea su necesidad, nuestro asesoramiento técnico y comercial está a su disposición. Seguimos innovando gracias a la formación permanente de nuestros ingenieros, así como nuestra participación en las ferias internacionales más conocidas dentro del campo.

Otra ventaja de HELION es el gran stock de productos que mantenemos a su disposición listo para su envío inmediato, evitando de este modo que nuestros clientes tengan que almacenar sus propias reservas.

Tenemos una relación calidad / precio que nos hace muy competitivos, solicite algunas herramientas con fines de prueba y comprobará los resultados.

Si tiene alguna pregunta, por favor llámenos. ¡Estamos aquí para servirle!

Trochoidal Speed Cutting System

Trochoidal Speed Cutting System

Trochoidal Speed Cutting System is a new machining cycle which combines circular milling with a forward moving thereby, huge cross-sections can be processed with low cutting forces and high speeds.

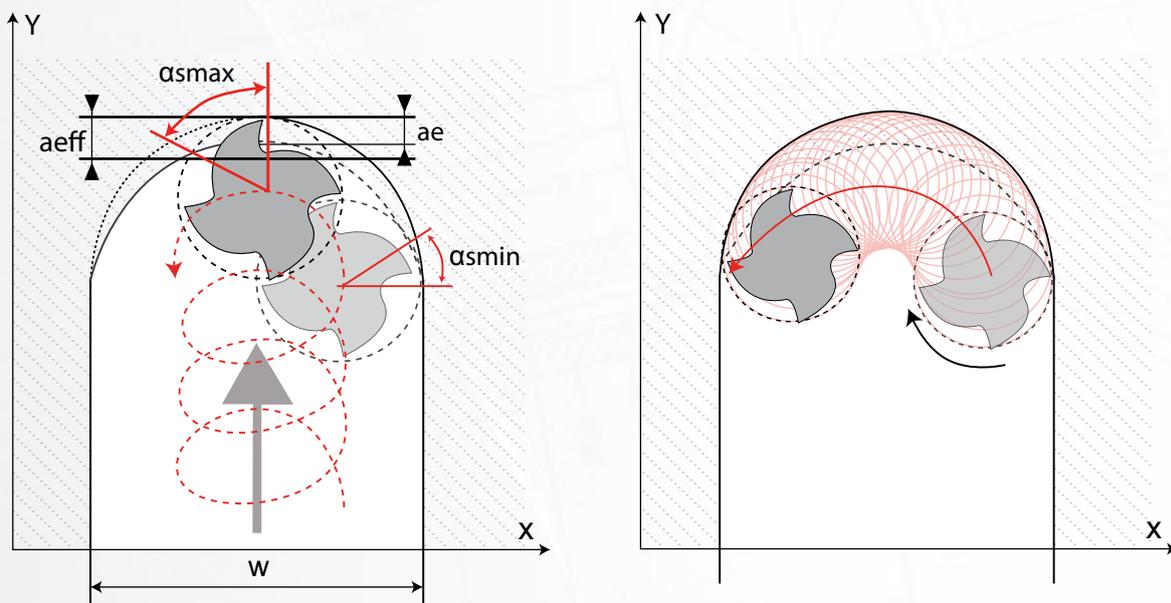

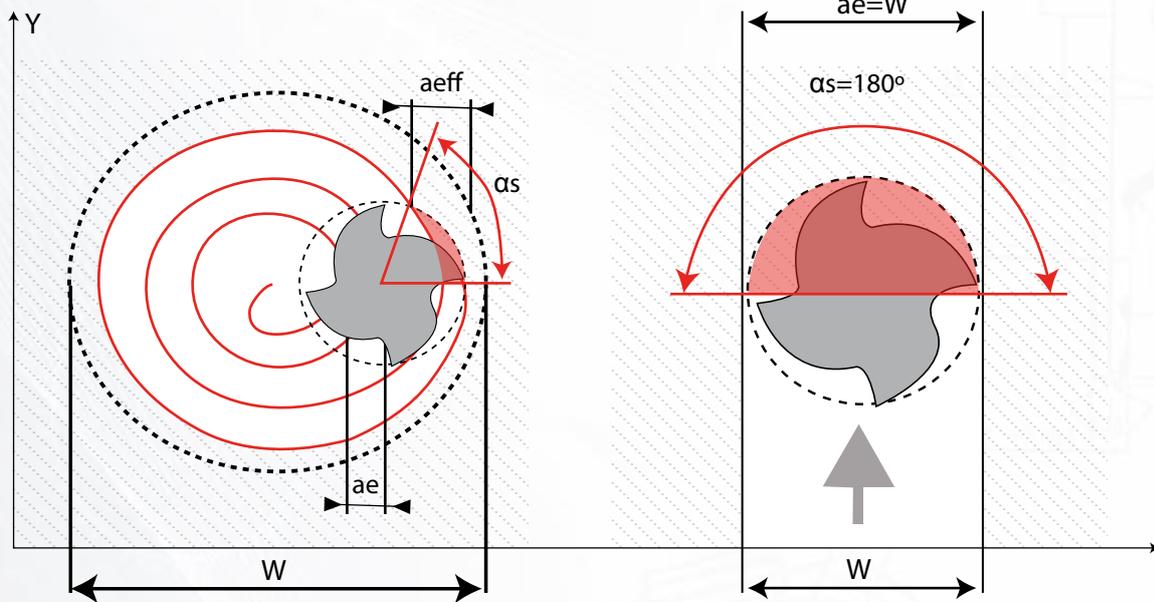

- ae : width of cut
- $aeff$: effective width of cut
- W : bore diameter / slot width
- (α) : angle of cutting bow

Circular milling vs. Full-slot milling
Mecanizado Trocoidal Vs. Ranurado convencional.

Sistema de Fresado Trocoidal (TSC)

El sistema de mecanizado Trocoidal es un nuevo ciclo de mecanizado que combina fresado por interpolación circular con un movimiento de avance, de esta manera, grandes secciones transversales pueden ser procesadas con bajos esfuerzos de corte baja y altas velocidades.

- ae = Ancho de corte
- $aeff$ = Ancho de corte efectivo
- W = Diámetro del agujero / Ancho de corte
- (α) = Ángulo de corte del arco

Sistema de Fresado Trocoidal (TSC)

When the two known types of machining are combined, you get static TSC milling (middle chipping thickness $h_m \approx \text{constant}$)

The main aim is to reduce the cutting force and the resulting heat development. This can be achieved by a lower angle of cutting bow " α ", which also enables a better chip flow. To reduce machining time a higher number of teeth is used, which also increases the feed rate.

TSC tools are mainly used for huge cross-sections and/or huge depths of engagement, difficult machining material and inefficient machines. The depth of engagement " a_p " should be bigger than $1XD$ for profitability. The tool radius should be significantly smaller than the smallest radius on the component part to receive reasonable cutting data.

During dynamic TSC milling ($h_m \approx \text{constant}$) of contours with modern CAM systems, the middle chipping thickness shall be held constant by increasing the feed considerably with a lower angle of cutting bow. When processing contours, the cutting data needs to be adjusted to the angle of cutting bow by way of calculation.

The diagram describes the recommended angle of cutting bow " ϕ_s " for the respective material and the engagement width in proportion to the diameter of the tool. In order to keep the middle chipping thickness " h_m " constant, the feed must be increased with a lower angle of cutting bow.

With optimum conditions, it's possible to save up to 60% processing time. The cutting data on-line program HELIONCUT offers you all options for calculating the variable cutting data.

Cuando se combinan dos tipos conocidos de mecanizado, se obtiene fresado TSC estático (espesor medio de viruta $h_m \approx \text{constante}$)

El objetivo principal es reducir el esfuerzo de corte y la generación de calor resultante. Lo anterior se puede lograr mediante un arco con menor ángulo de corte " α ", que también permite un mejor flujo de virutas. Para reducir el tiempo de mecanizado se utiliza un mayor número de dientes, lo que también aumenta la velocidad de avance.

Durante el fresado trocoidal TSC ($h_m \approx \text{constante}$) de los contornos con modernos sistemas CAM, el espesor medio de viruta se mantiene constante debido al aumento considerable del avance por diente con un menor arco de contacto. Al procesar los contornos, los datos de corte tienen que ser ajustados al ángulo de corte de arco a modo de cálculo. (Arco de contacto)

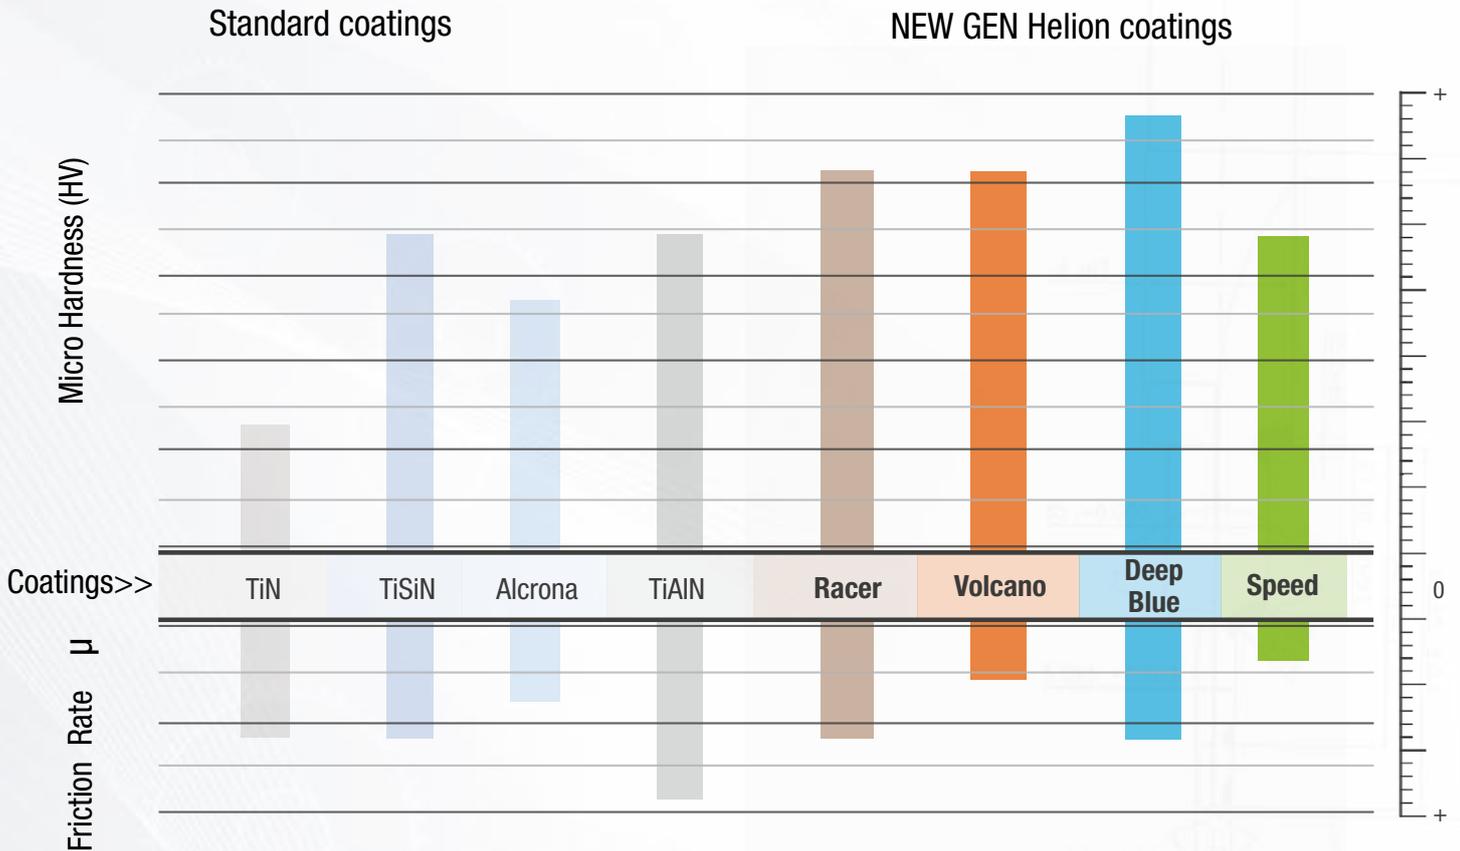

TSC son herramientas que se utilizan principalmente para grandes secciones transversales y/o grandes profundidades de corte, incluso en máquinas ineficientes o con material difícil. La profundidad del corte " a_p " debe ser mayor que $1XD$ para ser rentable. El radio de la herramienta debe ser menor que el radio más pequeño de la pieza para recibir datos de corte razonables.

El diagrama describe el ángulo de corte de arco recomendado " ϕ_s " para el material respectivo y, el ancho de corte en proporción al diámetro de la herramienta. Con la finalidad de mantener una medida media de viruta " h_m " constante, la alimentación debe aumentarse con un menor ángulo del arco de corte.

El programa online de condiciones de corte HELIONCUT, ofrece todas las opciones para el cálculo de los datos de corte variables. En condiciones óptimas es posible ahorrar hasta un 60% el tiempo de mecanizado.

COATINGS COMPARATIVE TABLE

NEW GEN Helion coatings advantage

- Increase the micro hardness compared to standard coatings.
- Higher oxidation temperature point.
- Lower friction coefficient, better chip flow and longer tool life.

Ventajas de los recubrimientos NEW GEN Helion

- Incremento de la micro dureza superficial comparado con los recubrimientos estándar.
- Temperatura de oxidación más alta.
- Menor coeficiente de fricción, mejora el flujo de virutas y alarga la vida de la herramienta.

HELIMOTION

NEW GEN
End Mills 2017

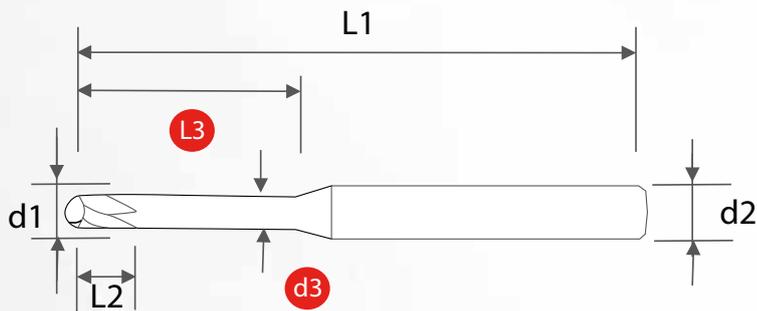

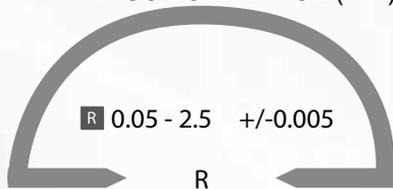

High Alloyed Steels

Harder coating • Mold and Die industry • Only for hardened materials
New and exclusive coating (PVD) • Improved dimensional tolerance
Much better tool life • Harder substrate • Heat resistant substrate
< 72 HRc • Smaller sub-micron grain with less cobalt

These cutting data depends upon the projecting length. If necessary correct vc + fz as well as "ae" and "ap" for archieving an optimal result!

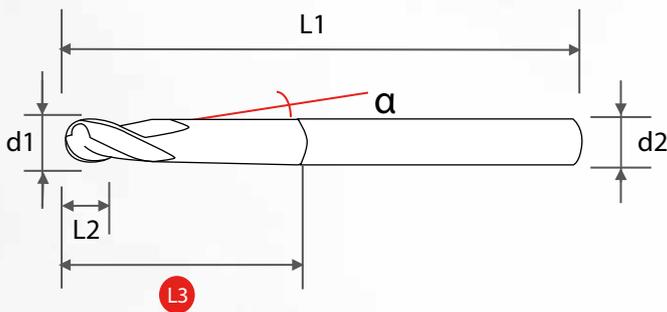

Estos datos de corte están sujetos a los voladizos de las herramientas. Si es necesario corregir vc + fz "ap" y "ae" para conseguir unos resultados óptimos.

These cutting data depends upon the projecting length. If necessary correct vc + fz as well as “ae” and “ap” for archieving an optimal result!

Estos datos de corte están sujetos a los voladizos de las herramientas. Si es necesario corregir vc + fz “ap” y “ae” para conseguir unos resultados óptimos.

Payment

Payment shall be made in accordance with terms and conditions notified to the buyer. In default of payment of delivered goods Helion may charge the buyer interest on overdue accounts and shall be entitled to take the necessary steps in order to ensure the collection of these payments.

Passing of property

The property of the goods does not pass to the buyer until it becomes entirely his payment. The Company reserves the right to repossess any goods in respect on which payment is overdue and the buyer shall cooperate in the event of the Company notifying its intentions of repossess.

Transport and insurance

Will be paid by the buyer. The merchandise always travels at the risk of the buyer being responsible for the cost of insurance if requested.

Claims

Claims will only registered if received within 30 days of the receipt of goods.

Return policy

If you want to return an item, please proceed as follows:

1. Inform us first by email or by phone:

| | | |
|--------------------|----------------------------------------------------------------------------|------------------|
| Logistics Division | logistics@helion-tools.com | +34 93 877 08 69 |
| Comercial Division | ventas@helion-tools.com | +34 93 877 08 69 |

If you send us an email, please wait for our response and acceptance.

2. Please add your package a copy of the corresponding invoice or delivery note and deliver free of charge.

Without this copy the delivery will be refused.

3. After receipt of the goods and a positive control we will send a credit note to you. We will charge a handling fee of 15% from the net value.

Please note: We accept only unused items and unopened packages. Discontinued articles are excluded. There is no obligation to take back incorrectly ordered items.

Technical features

Technical specifications can be found in the catalogue. Helion reserve the right to change some of these specifications without prior notice.

Warranty

We warranty the quality of our tools is so far as manufacture and materials are concerned, but not against inadequate handling or modification of the original geometry. The warranty excludes liability for damage and his consequences.

Delivery

Any delivery date is calculated by Helion as short as possible but no guarantee as to the date of delivery is given or implied. In case of delay, Helion will not accept any claim or annulations of special tools produced following customer request.

Jurisdiction

In case of dispute the customer will be subject to the jurisdiction of the courts of Manresa – Barcelona - Spain.

Pago

El pago se efectuará de conformidad con los términos y condiciones notificadas al comprador. Por impago de los bienes entregados, Helion puede cobrar el interés legal de demora en las cuentas vencidas y tendrá derecho a tomar las medidas necesarias a fin de garantizar el cobro de estos pagos.

Reserva de dominio

La propiedad de los bienes no se transmitirá al comprador hasta que se haga efectivo por completo su pago. La Empresa se reserva el derecho de tomar posesión de los bienes respecto de los cuales exista mora en el pago.

Transporte y seguro

Será pagado por el comprador. La mercancía siempre viaja por cuenta y riesgo del comprador y será a su cargo la prima del seguro en caso de que el cliente lo solicite.

Reclamaciones

Las reclamaciones sólo serán tramitadas si se reciben dentro de los 30 días siguientes a la recepción de las mercancías.

Política de devolución

Si desea devolver un artículo, proceda por favor de la siguiente manera:

1. Informe de la incidencia a través del correo electrónico o de los teléfonos que aparecen a continuación:

| | | |
|---------------------------|----------------------------------------------------------------------------|------------------|
| Departamento de Logística | logistics@helion-tools.com | +34 93 877 08 69 |
| Departamento Comercial | ventas@helion-tools.com | +34 93 877 08 69 |

Si nos envía un correo electrónico por favor espere nuestra respuesta y aceptación.

2. Incluya por favor en el envío de devolución una copia de la factura o del albarán de compra y entregue al transportista de forma gratuita. Sin la copia de los documentos, su solicitud no podrá ser aceptada ni procesada.

3. Después de la recepción de la mercancía y la realización de un control positivo, enviaremos una nota crédito a su favor.

Se le cobrará una tasa de tramitación del 15% del valor neto.

Tenga en cuenta por favor que solo aceptaremos artículos sin usar y que cuenten con su embalaje original. Los artículos fuera de stock quedan excluidos. Helion Tools no está obligado a devolver artículos ordenados de forma incorrecta.

Características técnicas

Las especificaciones técnicas se pueden encontrar en el catálogo. Helion reserva el derecho de cambiar algunas de estas especificaciones sin previo aviso.

Garantía

Garantizamos la calidad de nuestras herramientas en cuanto a fabricación y materiales se refiere, pero no en caso de manipulación inadecuada o modificación de la geometría original. La garantía excluye totalmente la responsabilidad por daños y sus consecuencias.

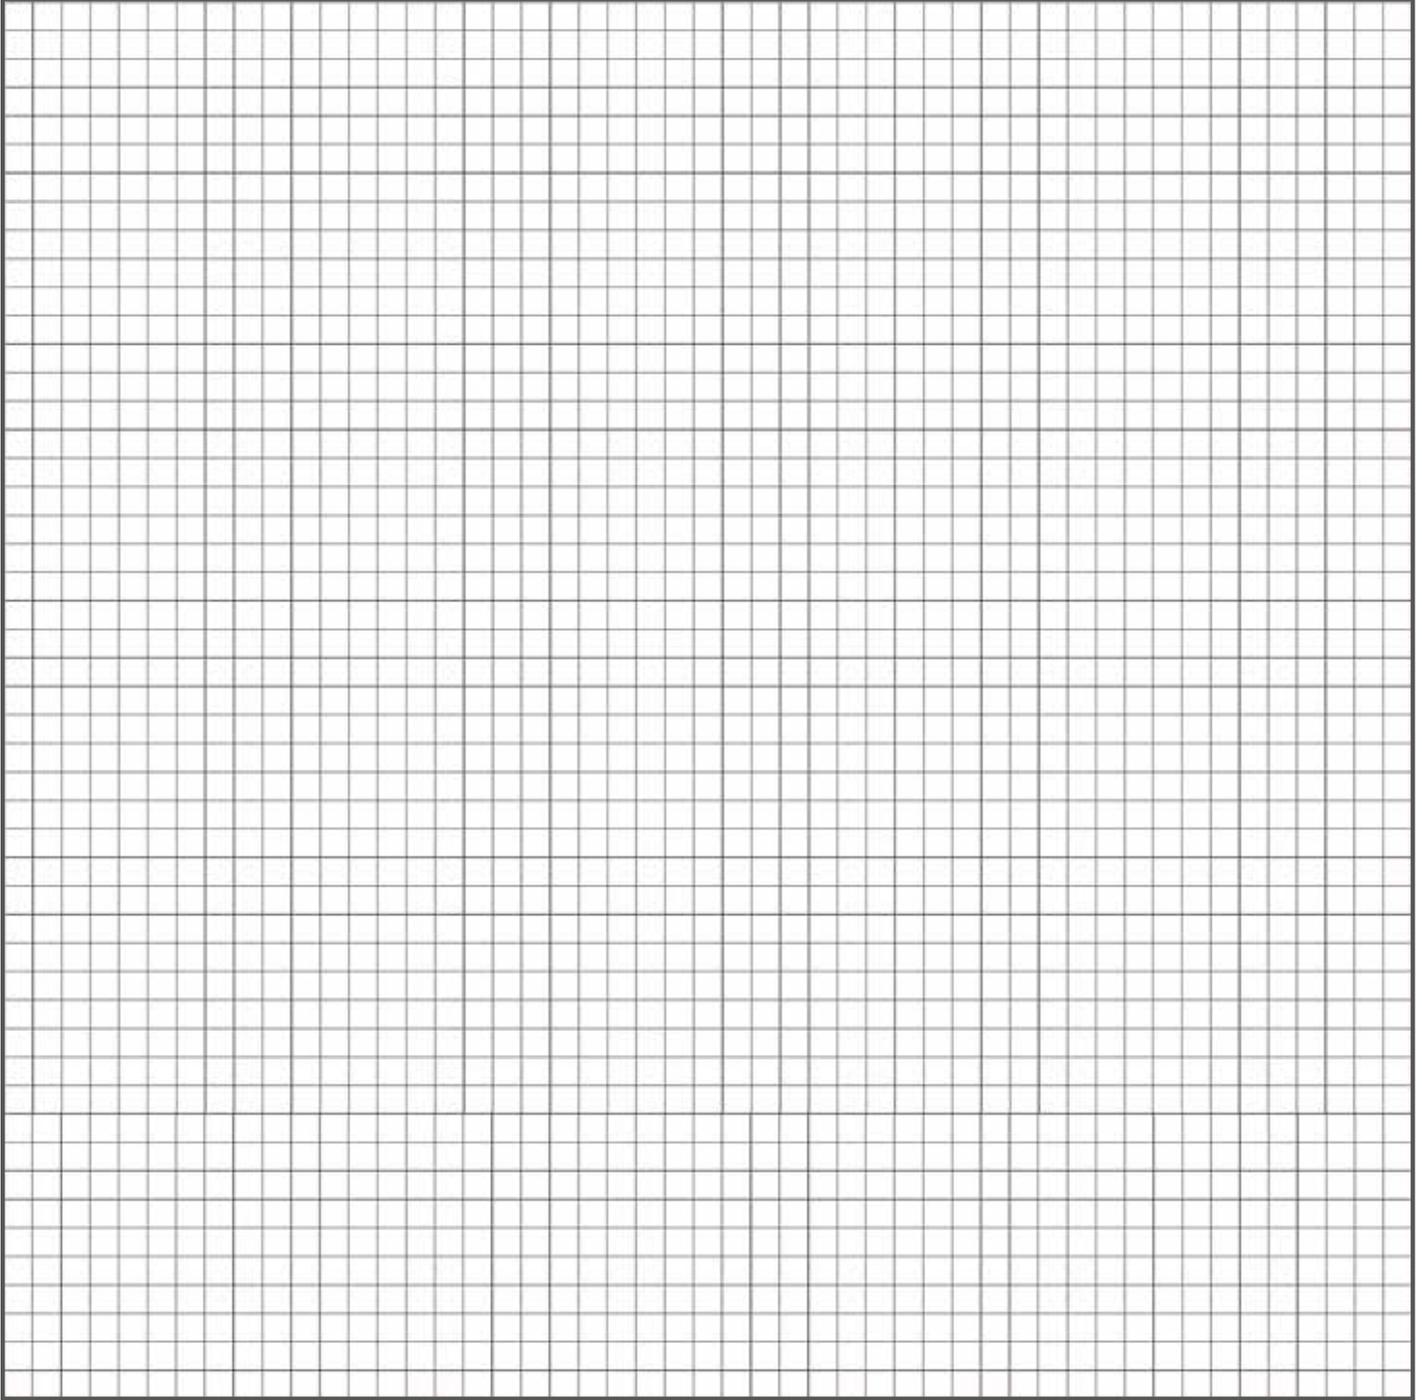

Entrega

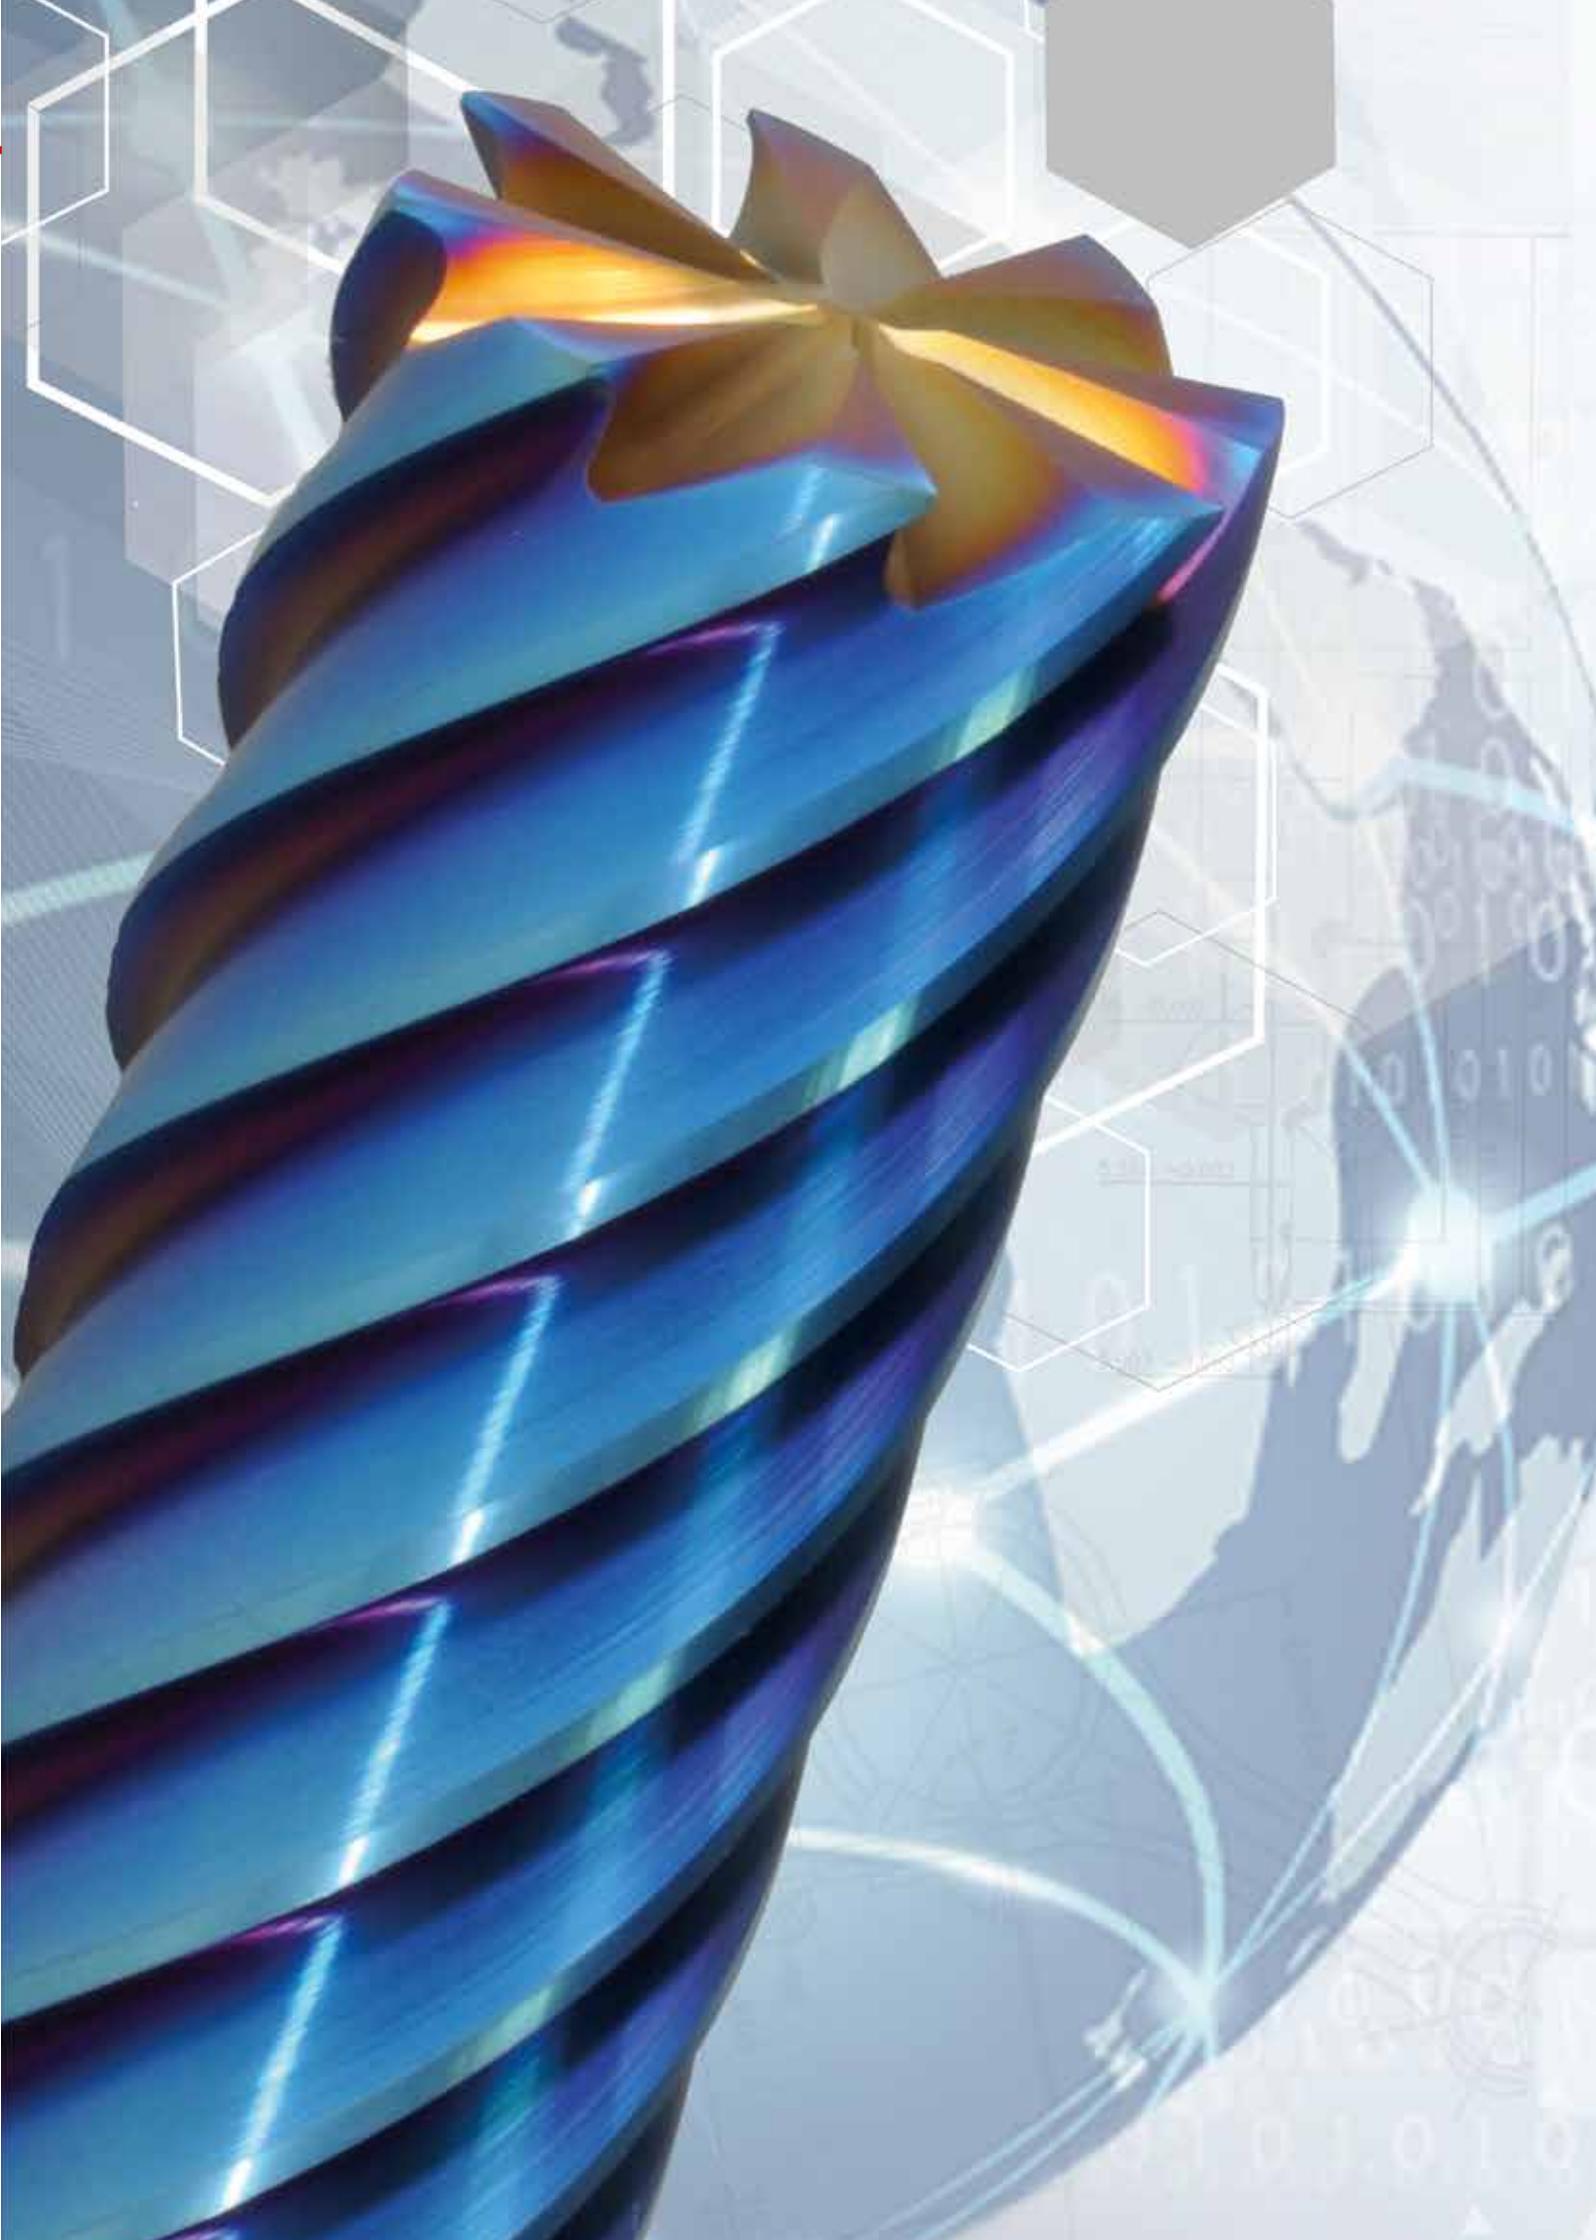

Cualquier fecha de entrega se calcula lo más corto posible, pero solo a título orientativo. En caso de retraso Helion no acepta ninguna reclamación o anulaciones de herramientas especiales producidos por petición del cliente.

Jurisdicción

En caso de litigio, el cliente estará sujeto a la jurisdicción de los Tribunales de Manresa – Barcelona – España.

Drawing / Dibujo

A large rectangular area filled with a fine grid of small squares, intended for drawing or sketching. The grid consists of approximately 30 columns and 40 rows of squares. The lines are thin and gray, set against a white background.
