

Stainless Steel Kitchens, Inc.

Specifications *Stainless Steel Countertops*

Material	Heavy 16 ga., 304 #4 (brushed) finish stainless steel (with protective PVC plastic that will be removed) backed with 5/8" marine plywood.
Thickness	Standard thickness is 1-1/2" thick. Other thicknesses are available upon request.
Backsplashes	Optional; Integrated backsplashes can be made from 4"H to 16"H. Backsplashes are 3/4" thick.
Edges	Radius (maximum 1-1/2") and 90 degree corners available. Marine edges are available to provide a non-drip edge.
Sinks	Integrated and drop-in sinks are available in single and double bowl.
Cutouts	Cutouts are available for cooktops and drop-in sinks.
Configurations	Available straight, L-shape, U-shape, and 45 degree corners.
Finishing	Welding is ground and blended to a satin finish.
Customization	All countertops are made custom to client's specifications.

**We continue to refine the specifications and construction. Improvements to above specifications may occur, but will not affect quality of construction.*

Effective: January 2017
