

Center Dot/Chip must be 2" away from any metallic Materials to the sides or **BEHIND**

Note:

- Clean thoroughly the **inside** of your windshield where the Tag will be placed.
- Tag can be placed just left of the top center of the windshield or the left side of windshield. (Do not attach to the rearview mirror)
- Make sure that the tag is not placed behind the "Metallic Shading" of the windshield.
- Make sure tag is not within 6" of another RFID tag, including FastTrak transponders
- Many luxury cars, especially European models, have windshields with metallic films, which can usually be easily identified with polarized sun glasses. These windshields will not allow these tags to work (see vehicle owner's manual for details of open windshield area for RFID tags).
- Tag Chip must be 2" minimum away from metal and **MUST** be on GLASS
- Tags must be installed horizontally
