OWN PRODUCTION GUARANTEES EFFECTIVE SOLUTIONS AND FAST DELIVERIES

Using the absolute best raw materials, Filtex produces a filter solution for your application, from standard products and standard filters to small runs of unique customer solutions. Everything is solid and well crafted.

We are a flexible company that works with environmentally friendly quality products. We are also known for our high quality and our fast delivery.

Thanks to our own production and our inventory of standard models, you are never far from your filter solution.

Our air filters are user friendly and always ready to install when you receive them. At Filtex AB you will always find the right filter solution for your business.

AIR FILTERS

An Ecopac air filter is made of synthetic composite media in filter classes G4-F9. It is made from synthetic microfiber. The filter is not electrostatic charged and contains no chemical binder.

With very low initial pressure drop, high airflow and full utilization of the filter surface, the Ecopac stands out from the crowd.

It provides a long life and high dust holding capacity. All our filters are tested according to EN779: 2012

BAG FILTERS

We use BWF Needlona to our filter bags. With extreme accuracy and unique materials has BWF become a world leader at dust filtration.

Our bag filters is of the highest quality product, they are designed for low differential pressure, long life and low dust emission. Depending on fiber type and application, you can get your bag filters sewn or welded.

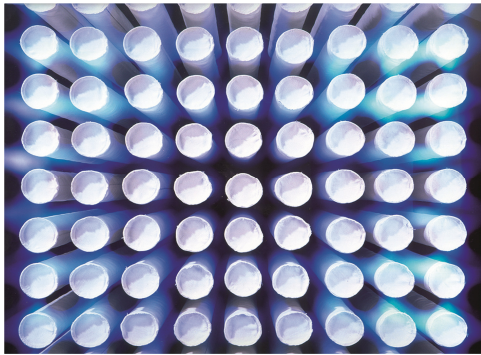

We produce in our own fabric, which means that we can provide the highest quality and reliable delivery.

PANEL FILTERS

The filter media contains pleated synthetic media. It can be delivered with plastic and cardboard frame. It's rigid and stable, withstands intense pressure, maintaining their properties. Production takes place in all sizes.

Glass Panels is adhesive treated, it can stand high dust concentrations with good performance.

Minipleat is dense pleated filters, they are used when a higher filtration is needed, available in M5-F8.

A Cleaner Experience

Filtex AB ensures that air and fluids are clean. For more than 30 years we have been a modern complete supplier for each filtration requirement.

The development in our business has been rapid and thrilling. The high requirements for a better environment in all areas, has put the spotlight on our business. Filtex has always been involved in the development and seen to be a leader in all types of filtration of air, gas and water.

The raw material we use are of the highest quality.

We cooperate with two of Europe's biggest and most knowledgeable suppliers in filtration materials. Our partner in terms of air filters is Kalthoff and dust filtration is BWF Group.

We guarantee the highest quality of raw material which we then assemble into filters that suits your requirements and into your business.

In spring 2003 started we, our own production and took control of assembling and sewing of all filters. We become more flexible in our filter solutions and one of the fastest providers in the market.

We are happy to share our knowledge and of course gives technical advice in all areas of filtration.

Welcome to us at Filtex AB.
