Stay on Top of Your Business

Alarm.com is a revolutionary wireless service that enables you to always know what's happening at your business property. With alert notifications and state of the art services like video monitoring, interactive security, thermostat adjustment and customized light control, you'll have confidence knowing that your business is running smoothly even when you're not there.

Stay Secure and Connected

Dedicated Wireless Connectivity – Stay protected and connected, even if the phone line is cut, the Internet is disconnected or the power goes out.

Exclusive Crash & Smash Protection – Rest assured with patented technology that protects you even if an intruder destroys your security panel.

2-Way Emergency Voice – Communicate directly with first responders through the security panel in the event of an emergency.

Instant Awareness – Receive alerts when alarms are triggered, doors open, the thermostat is adjusted, the power goes out or when any other event that's important to you occurs.

Remote Control – Arm or disarm your system, control lights, locks and thermostats no matter where you are.

Full Suite of Mobile Apps – Free, easy to use apps for nearly any mobile device.

See What's Happening

Live Streaming – View activity when a door opens or if a motion sensor is triggered on your property.

Video Alerts – Set rules to receive clips of activity that matters most to you.

Recorded Video – Capture motion or event-triggered clips to watch when you want.

Manage Your Energy

Smart Energy Management – Set energy saving schedules based on the exact activity patterns in your workplace every day of the week.

Lights and Thermostat Control – Remotely turn your lights on or off or adjust your thermostat. Set schedules to have them activate automatically.

Activity Patterns – Use behavioral insights from your security system to help make better energy decisions.

Extreme Temps – Automatically adjust your property's temperature when extreme temperatures arise.

Automate Your Business

Put Your Business to Work – Set schedules to regulate lights, locks and thermostats to match your business needs.

Intelligent Automation – Enjoy light schedules that adjust automatically with seasons and time changes.

User Code Access – Assign user codes to give selective access for doors and locks.

Customized Triggers – Use the sensors installed in your business locations to automatically trigger activity.

Get the free App for iPhone, iPad, Kindle Fire, Android, Blackberry and Windows Phone devices.
