

My Mini-Habitat

Materials Included:

- Clear plastic cup
- White base for biome
- 2 small animals
- Brown and green pipecleaners
- Magnifying glass

Materials From Home:

- Sand, dirt, small rocks, sticks and plants—Anything that you would find in your animal's habitat!

Instructions

1. Identify your animals!
2. Learn about their habitat (Where do they live? What does it look like?)
3. Collect some of the things you think you would find in your animal's habitat from your yard or on a walk.
4. Glue your animal to the white base plate and build up it's habitat around it. Include things like dirt or sand, small rocks and more. You can use the pipe cleaners for trees or grass and find other things in your home for things like rivers or ponds.
5. When you are done creating your habitat, glue the clear cup on top to keep it protected. Allow everything to dry overnight.
6. Please share a photo of your habitat with Dancing Spirit at <https://www.facebook.com/dancingspiritgallery/>
