BannerLift benefits

- ✓ a remote controlled mechanical system for raising & lowering displays
- ✓ using wire rope & an indexing mechanism that reduces wire tangling
- ✓ assures that display articles remain level at all heights
- ✓ adjustable display height for best impact
- ✓ eliminates campaign change issues:
 - expensive lifts
 - labour
 - tire marks
 - safety issues
 - damage to floor and walls

BannerLift Diagram

Diagram

UL approved tubular motor controlled by internal radio receiver provides safe and reliable operation

Thin aluminium extrusion provides clean presentation and keeps banner smooth

**Operated by
Remote**

Aluminium pocket assembly provides clean, smooth appearance. Pockets can be painted to match any ceiling colour

Cable indexing system reduces wire tangling concerns and keeps banners level at all heights

Stainless steel cables provide years of maintenance-free service
