

## Schools using ActivePure® Technology

### Vicksburg, MS:

Every elementary student at *Agape (private school)* chose in-person learning, so the school purchased an ActivePure Certified Cleaner that uses space technology to clean air and surfaces throughout the day. Safety measures like this played a large part in Boyd's decision to have her youngest child attend class in-person.

"My 8-year-old learns best in person, face-to-face," she said. "He has to stay engaged and doesn't have the attention span needed for virtual classes. I just knew it was imperative that he physically attend, and I'm very confident in the school's ability to keep him safe."

### Sarasota, FL:

Ed and Betty Rosenthal have donated \$12,000 to the *Hershorin Schiff Community Day School*, in Sarasota, to buy air filtration units in time for the 2020-2021 school year. The gift, made through the Rosenthal Roots Family Foundation's "Go Green" program, has enabled the purchase of 24 Aerus Pure & Clean units to be placed in classrooms.

### Bourbon, ID:

#### ***Triton School Board Says It's Being Proactive Against Coronavirus***

Riffle also explained that an Active Pure air filtration system was installed some 10 years ago throughout the schools and is in every room in the elementary school. The battery-generated system reportedly filters out 99.99% of mold, fungi, bacteria and viruses in the air ducts. The units are changed every three years.

## **Air & surface purification system installed at Regis Schools, Wis.**

<https://www.weau.com/2020/09/17/air-surface-purification-system-installed-at-regis-schools/>

EAU CLAIRE, Wis. (WEAU) - Keeping the air pure has been a challenge during COVID-19 - especially, as schools begin to re-open for the fall semester.

**Regis Catholic Schools** recently invested in 20 air and surface purification systems at its middle school and high school.

Each machine covers 3,000 square feet and runs for 12 hours at a time in any given space.

Principal Paul Pedersen says the investment helps increase protection for students and staff.

Pederson said, "The City-County Health Department really did a great job in putting together a good game plan that all schools needed to have and follow in order to open their doors to begin a school year. In our case being back in person 5 days a week, we're looking for that extra layer of protection - that one more thing that we felt like we could offer to our students and our staff and it really did reduce the anxiety that some of the older staff might have had, but I think it's been reinforcing for everybody."

## **SARASOTA, Fla.**

### **Pine View School Community donates 130 air purifiers for teachers and classrooms**

<https://www.mysuncoast.com/2020/08/30/pine-view-school-community-donates-air-purifiers-teachers-classrooms/>

Rosenthal tells me that her GoFundMe campaign went viral, and the community raised a little over \$70,000 in less than two weeks. It was enough to not only get an air purifier for all 112 classrooms at **Pine View School**, but also about 20 more for other Sarasota County Schools who need it.

## **Lake Havasu, CA:**
