

# VIRTUALVISION

*Station-based computing*

## Introducing the largest on-station control screen in the industry.

With VirtualVision PRO, Watertronics brings you the next **BIG** step in straightforward, user-friendly system controls.

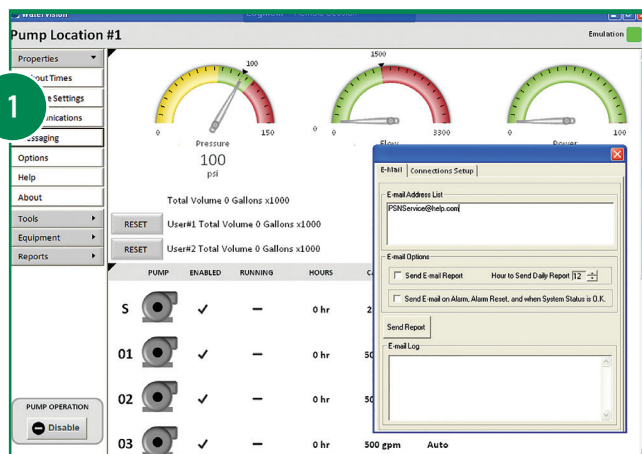

- ✓ Drag & drop user-configurable home-screen
- ✓ Brings the PC to the pump station
- ✓ On-board information vault at the station where you need it
- ✓ Industry-first trending screen tracks water & energy in a whole new way
- ✓ Largest touchscreen in the industry today!

Watertronics controls have been leaders in smart technology, helping golf courses worldwide reduce their water & energy costs. Today we take the next step with bringing all the capabilities you need to your fingertips, whether on the go or at the pump station. VirtualVision PRO allows full access and control whether you're in the pump house or checking in on your smartphone.

**VirtualVision PRO** solves the problem facing all superintendents today --- managing water in the most **affordable, efficient** way possible --- all in a non-intimating, instantly-**understandable** way.

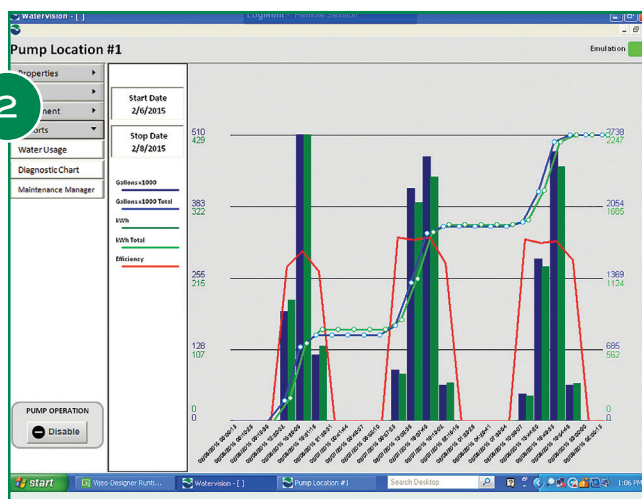

# How It Works

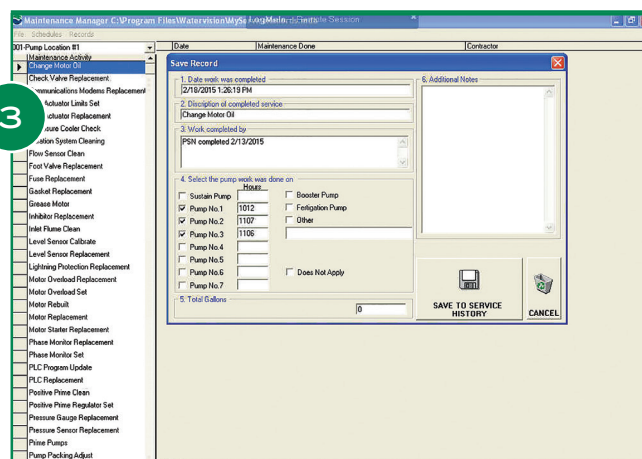

## USER-CONFIGURABLE HOME SCREEN

Wouldn't it be nice if you could drag & drop your favorite functions onto your home screen? Now you can. Even send emails from your pump station!

## TRENDING SCREEN: Daily Comparisons

Displays energy consumed over water pumped and provides a straight-forward efficiency rating so you can optimize your pumping operation.

## MAINTENANCE MANAGER

Makes it easy for the Service Tech to actively manage and record service activity – at the pump station where the work is being done! Easily access station performance test results, spare parts list, schematics, & mechanical diagram.
