

Crease Style Foam Fly... Kevin Cohenour

Hook	Long shank stainless, size 1/0 to 6
Thread	3/0 to match foam color
Tail	Bucktail or saddle hackle/bucktail
Flash	Krystal flash or flashabou on top tail
Body	Sticky back foam with nylon or mylar laminated
Eyes	Stick on tape eyes
Glue	Gel super glue and 5 minute epoxy

1. Tape nylon material or mylar sheet (nylon dress fabric works great, and is available in many colors) to table top with scotch tape. Peel protective paper from sticky back foam. Carefully laminate foam to material. You only get one chance so be careful!

2. Cut into rectangles, lengths equal to shank length, width about $\frac{3}{4}$ shank length. Secure hook in vise and wind thread to bend.

3. Attach tail of bucktail equal to shank length. You may use a tail of saddle hackle on top of bucktail (like on a deceiver) instead. Attach 10 to 12 strands of flash on top tail extending slightly longer. Coarsely wrap thread forward to eye (gives super glue a foundation to grab) and whip finish. Cut thread.

4. Fold foam in half the long way. Cut as pictured on bottom, tail and front.

5. Apply superglue to hook shank. Fold foam over long ways and glue to shank. Trim bottom flat to open gape.

6. Attach eyes and color gills and body. Coat lightly with epoxy over entire foam body and eyes.
