

SKILLED NURSING CARE & REHABILITATION

Our Skilled Nursing Care is designed to help us meet the special needs of residents who require intensive, highly individualized medical attention.

Because residents requiring skilled care typically must rely on the nursing staff to meet all or most of their needs, we make it a priority to provide a specially trained, caring nursing staff that is highly proficient in monitoring and observational skills. Our nurse and aides provide 24-hr care under the supervision of the Registered Nurses who are on duty every day.

We also focus on helping residents return to independent skills and functions as they become capable of doing so, offering a complete rehabilitation department with physical, occupational, and speech therapists available. In addition, we offer aquatic therapy facilities.

And, when residents have progressed to no longer needing skilled care, we can make help make the smooth transition to another level of care or back their home. This integration of levels of care is important to us- and, we believe, to our residents and their families - because we have found that it reduces the stress residents often feel it they move to another facility.
