SendPro™

Simplify shipping and save.

Introducing SendPro, the online shipping solution that simplifies the way your office sends through USPS®, FedEx® and UPS®. By integrating cloud-based software with a professional-quality label printer and digital scale, it's easy to weigh, compare shipping options, track shipments and manage expenses online—for all three carriers.

Streamline the way you send.

Ship from one place.
SendPro consolidates information for USPS, FedEx and UPS in one site, to standardize and simplify shipping. With one address book, all your contacts can be easily uploaded and used for every carrier. That means you won't need to reenter addresses for each recipient.

Weigh packages and print shipping labels with ease.
With our integrated scale and printer, anyone can send packages right from their PC. Accurately weigh packages with the scale and print professional looking shipping labels right from the integrated label printer.

### Access your existing account information.
SendPro works with different carrier accounts, including USPS, FedEx and UPS, so that you can still gain access to your negotiated rates.

Track every item online and send real time updates.
Check the status of all your shipments along their routes for all of the three carriers. With the email notification feature, you can keep both senders and recipients informed by emailing them the tracking numbers of their shipments.

Access SendPro from any laptop or smart device.
Users can keep track of shipments, whether they're in the office or working remotely. With the SendPro application available for download on your Windows device, you can ship even if you're away from your desk.

Control shipping expenses.

Determine the right carrier for your sending needs.
Choose from your own contract terms or retail rates with UPS® and FedEx®. With SendPro™, access the lowest USPS rates for Priority Mail and Priority Mail Express.

**Consolidate all of your shipping costs in one report.**
SendPro makes it easy to reconcile your shipping expenses. Now, you can see all of your shipments, for all three carriers, in a single report. There's no time-consuming record keeping because information is collected for you. Since SendPro lets you export files, you can easily upload shipping information into common accounting software in order to streamline your invoicing.

Designate staff and set user permissions.
As your business grows, more people are likely involved with shipping processes. It's also possible that they ship from more than one location. With SendPro, you decide who can use the system. This assures greater control and accountably over expenditures. You'll always have an overview of activity and expenses, plus the ability to generate detailed reports by user, client and department.

Scale usage to meet your business needs.
Whenever you need more people to use the solution, you can add them at any time, along with designated sending permissions.

SendPro™: Optimized for Windows 10
Easily accessed from any Windows 10-enabled device, SendPro simplifies office shipping by enabling users to ship, via multi-carrier, from their laptop or tablet. Now users can weigh packages, compare shipping options, print multi-carrier shipping labels, access centralized tracking and manage expenses, while enjoying the power and ease of the Windows 10 operating system.

- The voice activated, hands-free shipping lets Cortana do the work for you.
- The People App easily accesses contact information from multiple sources including Outlook, Gmail and LinkedIn.
- You can print labels from any Windows-configured printer.
- Eliminate the need for additional software downloads with the integrated scale.
- SendPro is available for download at the Microsoft Windows App Store: http://pbi.bz/SendProFreeTrial

Select the option that fits your business.
