Back in the summer of 2002, upon leaving a conventional economic development consultancy to establish Civic Economics, we could not imagine the ride we were embarking on. We did know our data-driven, planning-informed approach to economic development represented a better way.

But now we know our work really matters, because so many distinguished authors, advocates, and researchers rely on it for theirs. This bibliography includes 48 english language books that we know about. If you know of others, or if you write one, let us know.
