

AGT HYPER SYSTEM

Simplified - Low Cost system for High Flow Sites

- Flexible system design allows plug in play components to meet your exact water requirements
- One skid contains all the treatment, controls, pumps and instrumentation

Better Solids Management - Solids are removed as a dry solid.

Floating Iron Oxide Oil Sludge is eliminated.

Water Can be stored for longer periods.

Fully Automated - Controls the entire treatment site, not just the oxidizer injection- Controlled from the operators smart phone

Better management of solids while lowering chemical costs.

AGT Water Systems

Produced and Flowback Water Reuse:

- **Select your lowest cost of treatment - Advanced highest quality treatment to Minimal Treatment**
- Provides Iron and Solids removal at every level of treatment
- Even "On The Fly" Mode provides iron and solids removal with superior bacterial control
- **You do not require pits or ponds to settle your solids.** Our flow thru technology removes the solids and your pits stay clean.

Mobile Design

Plug and Play
modules can
be added as
treatment
targets
increase

- Self contained, fully automated systems process the water and are monitored with **AGT RSM**
- All running data is available online in real time
- These modular, mobile systems can be moved as required, with plug and play set-up
- Modular systems up to 200,000 BLD

Come visit one of our systems and see the difference
