

Introducing ‘International Ink’: Transportable skin art transformed into transportable sock art.

A long time fascination with the history and diversity of tattoo art has inspired Ozone’s newest collection. Tattoos have the ability and potential to tell stories, shape identities and express creativity. As original works of art from around the world tattoos are the very first pieces of mobile art.

For inspiration we dug deep into Ozone’s extensive collection of Tattoo Flash Art. These unique pieces of international folk art bring global influence from east to west and across centuries of time. Our renditions of ancient body art are faithfully recreated along with bold interpretations of modern motifs. Tradition and playfulness intermingle to create stunning new design.

Ozone has always been at the forefront of the international Tattoo Flash obsession. Long before newcomers capitalized on this unique art form Ozone featured a small, yet wildly successful, capsule of tattoo socks. Fifteen years later we reintroduce one of our most requested concepts as a brand new and fully realized collection of Tattoo Flash socks.

From the early dreams and fantasies of the first tattooist this new collection features time honored pieces of personal expression and rites of passage. And with a long standing love and appreciation for Tattoo Flash we proudly present art ready to walk the world: ‘International Ink’.
