

Underground Locators

Schonstedt[®] GA-52Cx

The GA-52Cx Locator detects the magnetic field of iron and steel objects and energized power lines. Both provide audio detection signals that peak in frequency when the locator's tip is held directly over the target.

Simply the best!

Schonstedt[®] GA-72Cd

The GA-72Cd is much like the GA-52Cx. However, the Ga-72Cd also has easy-to-read digital and bar graph displays signal strength and polarity. Once you have located a target using the audio signal, the digital readout and polarity indicators will help you to visually pinpoint the target and, in some instances, even determine its orientation.

Schonstedt[®] GA-92Xtd

One hand operation makes finding faster, providing both audio and visual indication of ferrous objects up to 16 feet underground. And the new XTD follows the Schonstedt tradition of ruggedness and reliability. Also, the GA-92XTD comes with a seven year warranty.

Extends for greater sensitivity • Retracts for easier carrying

Schonstedt[®] Mac-51Bx

The MAC-51Bx – the most cost-effective, all-purpose locating system on the market – consists of a magnetic locator, similar to the most popular GA-52Cx model, and a null-over-target pipe and cable locator capable of locating on two frequencies: 571Hz and 82.5kHz.
