

## **AGD SYSTEMS is contracted for UH-60A systems upgrades**

**Press Release** • July 10, 2017 16:00 EDT

Ft. Lauderdale, Florida July 10, 2017 (Newswire) - AGD SYSTEMS announces that is has been contracted to design, integrate and modify various systems to upgrade UH-60A helicopters for a fire-fighting contractor to be utilized in an aerial fire suppression role. The structural modifications and instrumentation upgrades provides the older UH-60A's with a glass cockpit with electronic displays replacing analog gauges with electronic instrument displays. The upgraded helicopter will replicate the UH-60M pilot-vehicle interface and improve interoperability.

Mark Daniels, CEO of AGD SYSTEMS was quoted saying, "Our upgrade solution extends the life and mission capabilities of the UH-60 platform while enhancing pilot situational awareness and mission safety", said Daniels.

### **About AGD SYSTEMS CORPORATION**

AGD SYSTEMS CORPORATION ([www.agdsystems.com](http://www.agdsystems.com)) is an emerging international company that focuses its business case in the transportation sector providing services to government and commercial industry.
