

# Fun Friday Science Exploration

Textbook: None

Fees: \$40/month (9 months) or \$170/semester or \$320/year. A non-refundable supply fee of \$50 is due at registration.

Supplies needed for class: Two 1-subject spiral binders, pencils

Welcome to Fun Friday Science! Fun Friday Science is an opportunity for 3<sup>rd</sup>-6<sup>th</sup> graders to explore one science topic each week.

Each week we will have a short introduction to the topic followed by hands-on stations and experiments on the topic. We will spend 8 weeks exploring different subjects in each of these topics: chemistry, physics, biology, and earth science. Students will keep a science notebook which will include the main ideas from the class along with an at home activities related to the lesson. These at-home activities should take no more than one hour per week.

Possible topics include: polymers, the basics of chemical reaction, phases of matter, circuits, magnetic fields, ecology, pollinators, types of rocks, volcanoes, Newton, light, and sound.

If you have questions about the course, please email me at [vivneal@gmail.com](mailto:vivneal@gmail.com).
