## Code Corner:

### Residential Sewer Rates

The City of Moran uses a winter water based sewer rate to establish your annual sewer rate. Your sewer rate is established based on the average amount of water used at your property during the winter months (December 1<sup>st</sup> through February 28<sup>th</sup>). The average use is calculated and applied to your utility bill beginning on March 10, 2023. Your monthly sewer bill will remain set until March of the following year. The amount of your current water usage does not affect your current sewer bill. To help reduce your sewer rates, limit water usage during monitoring months.

The winter water usage billing method is designed to more fairly distribute the costs of operating the sewer system. Studies show that the water consumed during the wettest months of the year (December through February) approximates average sewer flows. This is because outdoor water use should be at a minimum and most water consumed is returned to the sewer. If you have questions regarding your sewer bill and the City utility rates please contact City Hall at (620) 237-4271.
