Mr. Jorge Sosa, Mr. Fernando Sosa and Ivan Coriano
Transcon Lighting System

Re: Lighting Retrofit Project

Energy conservation projects are important to iPR Pharmaceutical to achieve overall cost reduction target. From the beginning it was clear that changes to the actual illumination system will bring a measurable cost saving and quick payback to the organization while at the same time reducing the carbon footprint.

The expertise of Transcon Lighting System helped our organization to understand all key factors to implement a successful lighting retrofit project. They started by providing a detailed site illumination assessment supported with real data showing measured and estimated energy consumption by building. The assessment was key piece to develop a detailed project plan and budget request. The project budget was 424K and after the implementation the post study shows a ROI of 58% on the first year.

At all times, Transcon proved to be contractor committed with quality, safety and customer satisfaction. All project implementation was done without any impact to manufacturing and common support areas.

Thanks for a job well done!

Best Regards,

Francisco Barreto, P.E
