Re: Suffolk Cement

Dear

Enclosed please find papers that you forwarded to Councilwoman Burke-Gonzalez regarding the Suffolk Cement property in Wainscott.

Unfortunately, due to the unknown nature of how the analyzed samples were collected, the Town is not in the position to use the information in any meaningful way. Such a determination is not to be viewed as the Town not being concerned about conditions at the property.

To that end, if you believe that there is contamination or illegal pollution at the site, those concerns are best addressed to the New York State Department of Environmental Conservation. They are the appropriate agency to investigate the concerns raised in the documents I am returning to you.

Thank you for your concern in these matters. If you have specific questions, please do not hesitate to contact me.

Very truly yours,

Michael Sendlenski Town Attorney Town of East Hampton

Enclosure Cc: Councilwoman Burke-Gonzalez

QUALIFIERS

Project: FOWP - CR6 (23) Pace Project No.: 701089

DEFINITIONS

DF - Dilution Factor, if reported, represents the factor applied to the reported data due to dilution of the sample aliquot.

ND - Not Detected at or above adjusted reporting limit.

J - Estimated concentration above the adjusted method detection limit and below the adjusted reporting limit.

MDL - Adjusted Method Detection Limit.

PQL - Practical Quantitation Limit.

RL - Reporting Limit.

S - Surrogate

1,2-Diphenylhydrazine decomposes to and cannot be separated from Azobenzene using Method 8270. The result for each analyte is a combined concentration.

Consistent with EPA guidelines, unrounded data are displayed and have been used to calculate % recovery and RPD values.

LCS(D) - Laboratory Control Sample (Duplicate)

MS(D) - Matrix Spike (Duplicate)

DUP - Sample Duplicate

RPD - Relative Percent Difference

NC - Not Calculable.

SG - Silica Gel - Clean-Up

U - Indicates the compound was analyzed for, but not detected.

N-Nitrosodiphenylamine decomposes and cannot be separated from Diphenylamine using Method 8270. The result reported for each analyte is a combined concentration.

Pace Analytical is TNI accredited. Contact your Pace PM for the current list of accredited analytes.

TNI - The NELAC Institute.
