

Contests for Students

The NW BOCES Board approves the concept of educationally related contests provided they are educationally/academically/ therapeutically sound and feasible.

Approval of the Administrative Director or his/her designee will be required in order to conduct a contest or activity involving awards to students by agencies outside the school.

In fulfilling the responsibility for approval, the Administrative Director will solicit opinions from the staff with respect to requests being considered.

The administration will limit participation in contests to those that are academically/educationally/therapeutically enriching, feasible, and timely. Contest activities should supplement and support the NW BOCES program not interfere with it.
