Use of Adobe mobile apps requires free basic level of Creative Cloud membership. Some features require paid subscription.

- Craft & share high quality images from your smartphone or tablet
- Tools range from simple one-tap presets to powerful advanced adjustments
- Capture photos using the DNG (RAW) file format using the in-app camera. (Requires latest OS and at least 12MP camera)
- Apply Photoshop magic with five specially formulated shoot-through presets (with newer smartphones) which can be previewed and applied at capture and adjusted later with full non-destructive capabilities. Import, edit, and sync raw photos you take with your camera (Requires CC subscription)
- Local adjustments let you selectively apply exposure, brightness, clarity and other adjustments to specific areas (Requires CC Subscription)
- Experiment freely with edits and revert to the original at any time with one tap
- Copy your favorite edits across multiple photos
- Share photos via Facebook, Instagram, Twitter, Flickr, and more
- Sync your photos across Lightroom on all your devices
- Access all Lightroom photos in Photoshop Fix and Mix among others

- Photoshop retouching for everyone, anywhere
- Retouch and restore photos using tools that produce the exact look, structure, and feel you want
 - Liquify – Push, pull, rotate, swell or reshape to create subtle or drastic effects
 - Heal & Patch – Fix imperfections using content from surrounding areas and blend the result
 - Smooth – Simply paint to smooth or sharpen skin, landscapes, etc
 - Lighten & Darken – Add or remove light from specific parts of a photo
- Edit and adjust photos using essential tools:
 - Color – Desaturate to remove all color or to create a mix of color and black & white
 - Paint – Get precise effects with an eyedropper to sample colors, an adjustable brush, and an eraser

- Edit and adjust photos using essential tools:
 - Adjust – Add vignettes and control exposure, contrast, and saturation
 - Defocus – Blur part of a photo
- Send images directly to Photoshop CC on the desktop to refine and take them further. Fix converts all your edits to layers and packages your image as a PSD file.

Lightroom Mobile

Prerequisites

- Adobe Creative Cloud Photography Subscription
- Internet Connection for syncing photos and edits
- Collections based sync
- Lightroom on the desktop
 - Can be used with one catalog/Adobe ID
 - Caution if you use more than one catalog

On Lightroom for Desktop

- Add photos to collections you would like to sync
 - Collections may not be Smart Collections
- Click in upper left corner of interface to login using your Adobe ID and password
- Click on the left of collection to turn on the sync for that collection.

Lightroom Mobile App

- Can be installed on IOS and Android devices
- Some differences between camera and tablet
- Login using your Adobe ID and password
- The first time will download all the synced collections.
 - Be sure you have enough space on mobile device
 - I use ~250MB for 530 photos
 - Uses Smart Previews for sync

Mobile Interface

- Can show Collections on left
 - Click on Collections to show that collection
- Click on Photo and see Marking and edit options at bottom of screen
- Can show by Collection or All Photos
