Passenger data can be entered three ways. If folks have flown with you before, their information can be stored encrypted in the operator's database. Then the task of adding a passenger to an active manifest is as simple as clicking a checkbox for that flyer. Operators can create any number of 'Frequent Flyer' lists.

When all of the passengers have been loaded into the active manifest, the 'Validate All' button reviews all passenger data and validates birthdays, passport expiration dates, whether US addresses are required and pre-matched against any countries' watchlist(s) that are loaded into the system. Currently APIS/SF-MadeEasy supports the US DHS's watchlists, and Canada CBSA's Special Persons List.

Training Mode - no actual data will be sent to any government agencies.

[Hold the Ctrl key to multi select.]
 ** Indicates that the crew member is a Government Inspector.

Please choose a flight.

Please choose a clearance airport.

*** Position Legend:**

CR1 - Cockpit crew and individuals in the cockpit
 CR2 - Cabin Crew (e.g. flight attendants)
 CR3 - Airline operation management with cockpit access (e.g. safety inspectors, instructors)
 CR4 - Cargo non-cockpit crew and/or non-crew individuals
 CR5 - Pilots on aircraft but not on duty (deadhead)

*** In-Transit:**
Please ensure an airport code is entered for any in-transit crew.

*** US Address:**
Please provide the address of the crew while in the US.

Crew data is loaded into the operator's database at setup time. Adding crew to a manifest is as easy as highlighting the crew members' names and clicking the 'Add' button. Position information can be adjusted for each flight leg manifest without affecting the permanently stored data (i.e. CR1 to CR5 or CR1 to CR2).

Document Send Flight Details: 1. 11/22/2014 - 312 - TLC To HAV

Sections	Review Comments
Flight Part91	Part91 data will not be sent.
Flight Passengers	All 5 of the Passengers have been validated.
Flight Crew/Non-Crew	3 Crew added.
Flight Leg Order	All Flight Leg dates and times have been specified.

Send to whom: Mexico (MEX) - Cuba (CUB) v

Sent Status Summary:
 Mexico (MEX): **Outbound not sent.**
 Cuba (CUB): **Inbound not sent.**

Performs an override so you can choose which countries that the document can be sent to.
 This is most likely used in the event:
 1. A Flight Inspector is onboard and Canada (CBSA) requires that they are sent as Crew and the USA (CBP/TSA) requires that they are sent as Passengers. In this event, the Inspector's details would be added as a Passenger and then the Passenger Manifest would be sent to CBP. Then, the Inspector could be set as a passenger No-Show. From there, their details would be added as a Crew member, thus allowing the document to be sent to CBSA.
 2. Crew documents are to be sent and the Overflight option is visible but not required.

Outbound from Mexico (MEX)	Inbound to Cuba (CUB)
Traveller type document(s) to send: <input checked="" type="checkbox"/> Passengers <input checked="" type="checkbox"/> Crew Two separate Crew and Passenger documents. Choosing a Crew Flight Type is not applicable for Mexico Outbound delivery. One document will be sent.	Traveller type document(s) to send: <input checked="" type="checkbox"/> Passengers <input checked="" type="checkbox"/> Crew Two separate Crew and Passenger documents. Choosing a Crew Flight Type is not applicable for Cuba Inbound delivery. One document will be sent.

Overflight to United States (USA)

Traveller type document(s) to send:
 Crew
 Separate Crew document.

APIS/SF-MadeEasy will display which countries need an APIS or API transmission. Check the 'Passengers' and/or 'Crew' checkboxes for Outbound, Inbound and/or Overflight transmissions and click the 'Send' button. Individual country transmissions can be controlled by checking the 'Override' checkbox in the middle of the page.

Training Mode - no actual data will be sent to any government agencies.

EDIFACT Send Status

Date/Time Sent	Flight Date/Time	Flight Number	Was Sent	Sent By	Sent To Country	Transit Type	Traveller Type	Traveller Count	Doc
