

Obligation 3

Lifelong, seek, gain and apply knowledge !

The brain needs exercising to keep functioning. The best exercises are seeking, gaining, apply knowledge and it's continuity. **1 God** wants each person to seek, gain, apply, pass on knowledge from conception to cremation. Knowledge continuity is every species immortality.

Seeking knowledge starts with free education (**Learn and Teach**). Followed by apprenticeship training. As required followed by further education. All education is public. Private education ends!

Provincial Government provides 'Free Education' from unborn to including Seniors. Non Government education is not supported, closed. Education (**free, public**) is provided by a Province and Shire.

SmeC 'Shire medical education Complex'

PHeC 'Provincial Hospital education Complex'

PDEc 'Provincial Defense Emergency center'

CE 'Community Emergency service'

Education is a collaboration between parents, educators and medics. It involves Free education, Free health and paid (**wmw**) Apprenticeships. No, homework! No, non government education! No, Universities!

Apprenticeship, when there is an opening promoted by work experience seniority. Further study after qualifying. When there is an opening, promoted by work experience, seniority....

1st Learn, when comprehending, start teaching. In free education fast learners teach slow learners. At work the experienced worker trains new comers. At home, grandparents teach children, grand children. Parents teach children.

Seeking knowledge means asking questions. Gaining knowledge means getting answers. Applying knowledge means using answers to have ideas and then taking action. Continuity means passing on all accumulated knowledge to the next Generation.

How to question ?

1st a question is formulated (**important, to receive a useful answer**)

2nd who to ask '**Seek**' someone with the right qualifications (**there may be a need to ask more than 1 person**)

3rd thank the person who answered (**good social skill**)

4th **'Gain'** an acceptable answer (there may no acceptable answer)

5th Write or audio, visual record answer (s)

6th **'Apply'** what you **'learn'** (answer)

7th Use your new knowledge to **'teach'** others (Knowledge continuity)

What to question ?

Everything (intelligent, seeking and gaining knowledge)

When to question ?

Now (intelligent, good social skill)

Why to question ?

A need arises to ask questions (curiosity, must know, conversation)

Ideas are the beginning of the Future.

Ideas make it possible to keep up with evolutionary changes. Ideas are the most creative, productive of all intellectual property activity. Ideas are preserved through Knowledge continuity.

Don't let Ideas be forgotten or lost. Write them down. Store, sort, file and revisit them!

Every day lots of ideas are thought off and quickly forgotten or lost. The reason they were not preserved, recorded or written down. The best are lost!

Memory is unreliable when it comes to preserving and nurturing new ideas. Carry a notebook (planner) or recorder with you. When an idea develops, preserve it. Weekly file your ideas!

Plagiarize to build on and advance new ideas. Why rewrite something that is well written. Rather use it! Expand on it. Evolution progresses by building on existing and then creating new. Do the same. An idea comes to an end. Salvage anything that can be recycled to advance new ideas!

Review your ideas. As you review your ideas (every 4 weeks). Some will have no value. They are not worth hanging on to. Discard them. Some ideas appear useful now or at some later date. Keep these, file them: 'Active', or 'Later'. After reviewing, filing, take the 'Active' file.

Pick an idea! Now make this idea grow. Think about it. Tie the idea to related ideas. Support your idea with research, try to find anything akin or compatible with this idea. Research internet, archives, libraries...use questionnaires. Investigate all angles and possibilities.

You think your idea is ready to be applied. Do so. Try to get feedback so the idea can be fine tuned. This idea is active, pick the next,....

Future proof ideas through Knowledge continuity. Ensure Knowledge continuity by keeping your ideas files updated. Furthermore in your 'Will' mention where they can be found.

Knowledge continuity

Knowledge continuity makes an individual's knowledge (intellectual property) immortal. Every individual from age 14 keeps record of their life experiences (both positive and unsettling). Family's capture, preserve and nurture their intellectual property heritage.

A person's knowledge is shared with family (parents, grandparents), community. Sharing is oral, audio (story telling), video (showing), shadowing (hands on).

Organizations capture, preserve and reuse their employees, 'I.P'(intellectual property). Community's utilize their citizens intellectual property for the good of all. Provincial Government keep Archives.

When an employee leaves, vast amounts of I.P. are at risk. To counteract this brain drain it is critical that a employee's intellectual property is preserved. It is essential to capture, preserve this knowledge before the employee leaves. Capturing means audio (story telling), video (showing), shadowing (work alongside).

Note ! All Intellectual Property is Shire (community) owned! There is no copyright no patent! Claiming copyright is stealing from the Shire!

AS it is Written It Shall Be
