

WARRANTY

EZ Log Structures are warrantied for a period of 5 years, calculated from the year shown on the Identification Plate attached to each structure. The warranty covers: seal failures in glass, hardware, thru splitting of wall logs, and any defective components produced that cannot be used for assembly.

WHAT IS NOT COVERED

Any inherent features of wood such as; checking, warping, twisting, natural color variations in wood, damage or deterioration caused due to lack of sealers or paints. Defects caused by; faulty installation, inadequate foundations, natural drying of wood, knots that do not affect the structure or changes to the structure made by anyone other than the manufacture.

This warranty shall cover the cost of replacement parts only.

Quality Certificate

Tene Kaubandus OÜ
Lihula mnt 22B
Haapsalu, Estonia

We hereby declare:

In our production we use wood species "Picea Abies" which belongs to class of coniferus.

According to the current classification standards of the Nordic countries the lumber used in production meets the quality grade **AB**

The materials are kept in the prescribed conditions, both, before and after the treatment. The final product is wrapped and protected from moisture and sunlight. The wooden components have not been treated with chemicals.

The moisture content of the material is 16-18%

The material used in production refers to the standard INSTA 142 strength class T2, which meets the standard C24.
