

Ami Soifer

world-class engineer of IT designs

entrepreneur

C-Suite role model

bridging the IT, cybersecurity and entrepreneurial worlds

"Cybersafety begins with solid IT management."

Ami Soifer is an Israeli-born American with over 25 years of IT experience working on mission-critical Global 2000 firms including UBS, GE Capital, Perrier, MSNBC, municipalities, and hedge-funds of all sizes. Educated at Boston University as an Electrical Engineer, Ami is considered by many to be one of the world's foremost secure application delivery experts and has engineered many IT designs and implementations, locally, nationally and globally.

As CEO and Co-Founder of his own firm, Ami has created an IT company whose culture is positive, transparent, thought-provoking and educational. Outside the office Ami serves as a mentor for business leaders and was for over five years a go-to resource for his regional Young Elected Officials (YEO) chapter. In short, Ami brings to his audiences a very special kind of appreciation for the inimitable responsibilities of CEOs, CIOs, CISOs, managing partners of law, financial services and accounting firms, and department heads and professors at colleges training the next generation of computer, IT and cybersecurity professionals. A married father of three, Ami has a special interest in contributing to a frank discussion of cyber matters as an inherently dynamic and growing dimension of life as we live it. See his interview, ***Why the Worry about Wi-Fi?*** by clicking on the *Security Briefs* blog above.
