

# **Chlorophyll- Evergreen**

## Nature's Green Magic

*Evergreen is a nutrient dense, refreshing alkaline beverage made of concentrated chlorophyll, the same ingredient in plants that captures sunlight and converts it into energy. Chlorophyll is the life essence (blood) of the plant.*

*Evergreen is a highly assimilable chlorophyll source. The key word is assimilable! One vial of Evergreen contains as much usable and assimilable chlorophyll as an entire quart of other liquid chlorophyll.*

*Dr. Chen began researching Evergreen with the understanding that the human body can only use chlorophyll in its natural, oil-soluble state. However, all other liquid chlorophyll supplements, in order to remain stable and not spoil, are chemically altered into a water soluble state during processing, and the body does not receive as much benefit from them. Evergreen is unique in that it enters the body in the oil-soluble form.*

*Evergreen is the first chlorophyll product to utilize Dr. Chen's exclusive purity-sealed single serve bottle design, thus naturally preserving this concentrated chlorophyll source. This technology allows the chlorophyll to remain in a natural oil soluble state which the body can use. One vial of Evergreen is more potent and digestible than a whole bottle of most water-based chlorophyll products available commercially.*

- *Evergreen helps bring oxygen to the cells for repair, detoxifying and purifying.*
- *Evergreen, rich in minerals, brings oxygen to blood to oxygenate, fortify and cleanse*

- *Evergreen is an effective internal and external antiseptic, cell stimulator and rejuvenator, and red blood cell builder*
- *It is an excellent fallback when it is hard to include the 4-5 suggested greens in a daily diet.*

Among many chlorophyll attributes are:

- Promotes better circulation and digestion
- Renews tissues
- Promotes healthful intestinal flora
- Cleansing and healing to the intestinal tract
- Improves liver function
- Helps cleanse radiation
- Inhibits bacteria and fungus (such as Candida).
- Lubricates the ileocecal valve preventing constipation.
- Improves the absorption of nutrients
- Helps the body to ward off infection by enhancing the immune response.
- Moisturizes and smoothes the skin
- Sweetens the breath, neutralizes body odors
- helps with digestion and to neutralize gas
- excellent for allergy sufferers.

***Evergreen is like a lubricant for the whole body to run smoothly.***

## Evergreen vs. Barley Green

A health care professional did a test on *Evergreen* and compared it to *Barley Green* by putting them on a scale of one to ten. *Barley Green* tested out as a three in terms of health benefits. *Evergreen* tested as a 13 because of the oil soluble chlorophyll and so much more concentrated.

July 2006 TOTM Dr. Steven Smith says: "Think for a minute of what is chlorophyll's function. It is made through the photosynthesis process and is so similar to the oxygen-carrying Hemoglobin molecule in our blood. Think of how animals graze on some fashion of chlorophyll-laden plants by which they stay extremely healthy. I have researched this chlorophyll phenomenon, and personally must have its foundational beneficial effects. I inspire my clients to take it as well. Sunrider's half ounce of concentrated liquid *Evergreen* is, in my opinion, equal to a quart and a half to 2 quarts of fresh organic carrot juice. I mix a vial of Sunrider's *Evergreen* in a cup of water and get the exact same feeling of health and energy that I derived from all the juicing I used to do."

straight from the vial or added to your *Calli* or water. *Evergreen* begins to lose its nutritional effectiveness once the bottle is opened. It is recommended that the *Evergreen* be consumed within 24 hours of opening the vial. Add one vial of *Evergreen* to one or two eight-ounce glasses/cups of *Calli*, *Fortune Delight* or water. Ideal: 2-3 vials per day. Ingredients: Copper Chlorophyllin (from Alfalfa), Peppermint Oil, Zinc Amino Chelate, Iron Amino Acid Chelate.

***For optimal results, begin and end your day with Evergreen. Great for athletes and for everyone to keep fit and healthy!***

## Morning Zinger

An excellent morning drink upon rising to flush the kidneys and keep them functional. is warm water, some organic lemon juice, and some *Evergreen*. This literally will **break up crystals and stones while it cleans out any uric acid.** This morning "zinger" is especially good if you have a propensity toward **kidney or bladder infections.** Or for a delicious, energizing drink throughout the day, one may add one vial *Evergreen* to 1-2 quarts of *Fortune Delight* and/or *VitaFruit*. *Evergreen* can also be drunk
