

PUBLIC NOTICE

NORTHDALE SANITARY DISTRICT Fails to Monitor for Arsenic

NORTHDALE SANITARY DISTRICT is required to monitor your drinking water for arsenic during every calendar quarter. Results of regular monitoring are an indicator of whether our drinking water meets health standards. During the July -Sept. 2018 calendar quarter, we did not monitor for arsenic and therefore cannot be sure of the quality of the drinking water during that time.

The State of South Dakota and the US Environmental Protection Agency (EPA) set drinking water standards and have determined that excess levels of arsenic may be a health risk. Drinking water that meets the standards is associated with little to none of these health risks and should be considered safe with respect to arsenic.

NORTHDALE SANITARY DISTRICT is taking the following actions to correct this problem

We have since taken the required sample. Additional measures within the water system administration have been put in place to ensure samples are taken properly in the future.

This notice and test results are posted at <http://www.waterbillingservices.com/northdale.html>

Please share this information with all the people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this notice in a public place or distribute by hand or mail.

For additional information, please contact BRANDON POWLES, PO Box 9141, Rapid City, SD 57709. Or by phone at 605-716-7771 or 605-431-2678.
