

Good morning! Hope you made it to and from your game last night safely.

Let's finish up the week with another freedom of movement play. Take a look [here](#).

Illegal contact with regards to freedom of movement? Looks like it is!

The contact happened as L initiated the rotation. L appears to be looking at the play as he rotates and the old T/new C is looking where he should also. Maybe they just passed on the contact. Bottom line is that the head of NCAAM officiating says they should have called a foul.....and in seeing the film, they would probably agree.

Hopefully we are more aware of freedom of movement in:

- 1) On ball play (hand checking)
- 2) Off ball play in half court sets, and
- 3) Throw-in plays

Pre-game the freedom of movement topic EVERY game! Get it in your head and recognize it when you see it!

Friday Extra: We should ALWAYS end our pre-game with "Remember, we need to HAVE FUN this game!"

SAFE TRAVELS tonight and tomorrow and have a great game!

Tim
