

10-Hour OSHA Maritime Safety & Health Course for Shipyard Employment

Course Director/Instructor

John M. Fernandez, CIH, CSP, CMC (Certified Marine Chemist), Industrial Hygiene Professionals, Inc.

Benefits

Lectures, video presentations, classroom exercises and discussions provide students with an overview of key OSHA Maritime Standards for Shipyards (29 CFR Part 1915). Students are introduced to OSHA policies and procedures as well as general safety and health principles necessary for a safe work environment.

Who Should Attend

NAVSEA Standard Item 009-74 requires all repair and maintenance employees working on vessels, dry docks and piers to complete this course within 60 days of employment. However, this course is appropriate for anyone seeking to increase their knowledge of safety and health in shipyards.

Selected Course Topics

- ❖ Introduction to OSHA
- ❖ Walking and Working Surfaces
