Iron and Oak

Depend on Iron & Oak

You can depend on Iron & Oak products and customer support. Since 1982, Iron & Oak commercial log splitters have been rated among the top in the industry for their performance, ease of use and reliability. Built for commercial use, Iron & Oak log splitters are engineered with precision to ensure efficiency and built with quality components that meet exacting company standards.

Quality Manufacturing

All Iron & Oak log splitters and other wood handling products are American made and are designed, fabricated, welded, and powder coated in-house for total quality control.

FAST CYCLE

Speed up your splitting by more than 25%. You'll split more wood, more quickly since Fast Cycle models feature just an 8 second cycle time.

National & International Coverage

Fast | Versatile | Resilient | Dependable

Log Dislodger

Helps eject any log that sticks to the splitting wedge and protects the control valve and other hydraulic components from damage.

Direct Pressure

Because of the alignment and power created by the cylinder, constant force is applied, allowing even the toughest logs to be handled with ease.

Reinforced Beam

Super tough, carbon steel beams

Wide Wedge

By using a wider wedge on our splitters we help to reduce the cycle time per log and create an overall cleaner split.

Duro-Glide units feature finished beam bolts which align the beam underneath utilizing 16 pads so you don't need to grease them. A great rental option!

Standard Features

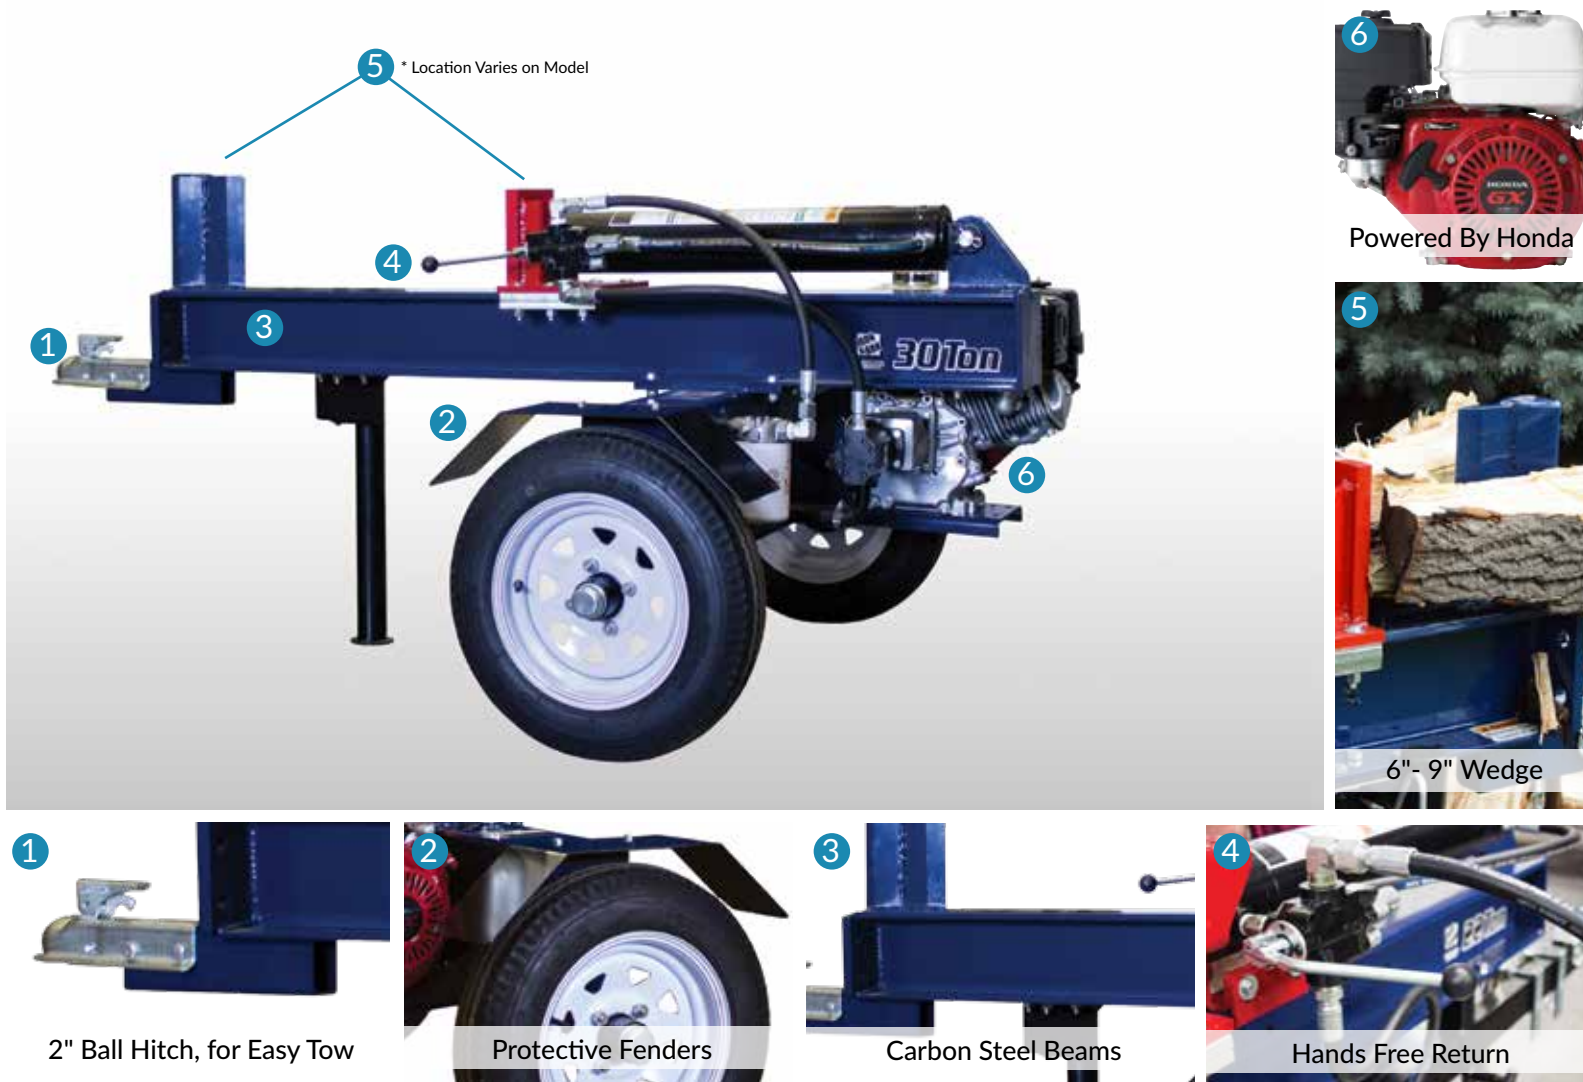

- **Laser cut, carbon steel splitting wedges** for improved quality and durability
- **Log dislodger** keeps logs from getting stuck
- **Boxed beam** for added strength
- **Road towable** for easy transport at a maximum of 35 mph
- **Honda commercial engines** for reliable, efficient power

Time

Two-Way Splitting

Model BH2W2015GX features Dual action splitting reduces time by allowing the wedge to split both directions without having to reset itself.

Log Lifter & Positioner

Model BHH4013GX30 allows you to easily roll logs onto the mechanical lift, saving you from having to bend and lift logs.

Fast Cycle

Speed up your splitting by more than 25%. You'll split more wood, more quickly since Fast Cycle models feature just an 8 second cycle time.

Horizontal/Vertical Log Splitters

"We (at Weldy Sales & Service) have been selling Iron & Oak splitters for 20 years and have been very satisfied with the performance of the various models we have received. Our rental units have held up very well and I especially like the new unit with the Honda engine. Any warranty issues have been satisfied as well. We have used mostly the 20-22 ton horizontal/vertical units for our rentals because they are well balanced and easy to move around"

-Phil Weldy, Buchanan MI

Horizontal/Vertical

Horizontal/vertical splitters are designed for easy transition between operations. With the easy pull of a pin you can change to the vertical operation for those extra large logs and save your body from strain.

Duro-Glide

Duro-Glide units feature finished beam bolts which align the beam underneath utilizing 16 pads so you don't need to grease them.

Fast Cycle

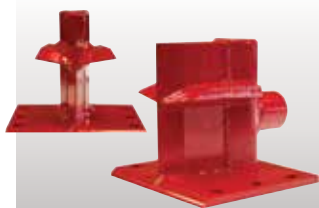

Speed up your splitting by more than 25%. You'll split more wood, more quickly since Fast Cycle models feature just an 8 second cycle time.

PN: BR021175 shown.

4-Way Wedge

Item # BR021175/BR021270-KIT

Quickly split large logs into small pieces with this 4-way wedge.

All hardware included.

**Iron & Oak models manufactured in 2014 and earlier will require Item # BR021172-14 to use 4-Way Wedge.*

10' Hose Kit

Item # TMH 10' HOSE KIT

Kit contains 2, 10' hydraulic hoses with fittings. One end features a male 1/2" NPT fitting and the other a male quick-connect fitting.

Engine Guard

Item # BR021248

Protect your splitter's engine from falling logs. Mounts easily on current models.

All hardware included.

Log Catcher Kit

Item # BR021185

This heavy-duty log catcher attaches to the log splitter's cradle and catches the split logs as the wedge drives through to make stability easier.

All hardware included.

Log Cradle

Item # BR021186

Log cradle catches split logs – no more stopping to pick up split pieces! It serves as a work table for large logs and mounts easily on current models.

All hardware included.

Log Dislodger (Replacement)

Item # BR021172-14

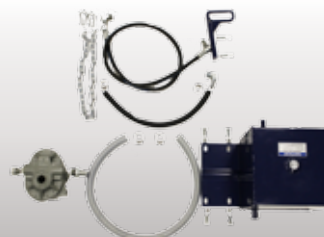

Helps eject any log that sticks to the splitting wedge and protects the control valve and other hydraulic components from damage.

Log Splitter Cover (Log Splitter)

Item # GNE-1100-CVR

Protects your log splitter from the harsh weather elements.

PTO Kit

Item # BR026003SA

Run your log splitter off your tractor's PTO instead of hydraulics.

Safety Flag Kit

Item # BR012104

Improves visibility of log splitter when backing up or towing. Heavy-duty tapered fiberglass pole won't bend over at towing speeds.

All hardware included.
