

TS 189 – Application for Admission

Appendix A: List of Segments Used

This appendix serves as an index for the data segments used in the “Guide to the Implementation of Electronic Applications for Admission to Educational Institutions.” A data segment may appear more than once within a transaction set. The data segments appearing in TS 189 are alphabetized according to segment ID. When referencing a segment’s position within the transaction set, the format is X/NNN. X is ‘1’ if the segment appears in the Table 1 Heading section and ‘2’ if the segment appears in the Table 2 Detail section. NNN is the position within section X as listed in the segment summary appearing at the beginning of TS 189 in this document.
