### SendPro™ P1000

# Take control of everyday challenges.

## Integrate the sending process.

Shipping and receiving packages, and sending daily letter mail are all a necessary part of doing business. Yet, these seemingly simple tasks are actually complicated processes that demand proper attention.

The SendPro P1000 simplifies the process by integrating mailing, shipping and receiving into a single processing system. With this integration, the P1000 provides a simpler, more streamlined way to send letter mail and large envelopes as well as ship packages using your USPS®, FedEx® and UPS® business accounts.

Plus, with sending costs rising and shipping becoming more complex, the SendPro P1000 can also quickly improve productivity and cost efficiency in your office.

## Mail, ship and track with ease.

For letter mail, the SendPro P1000 will seal and print postage for your short and longer runs at up to 180 letters per minute. It handles thin or thick mail as well as small or large envelopes.

For packages, the P1000 takes away guesswork, by allowing you to review services provided by USPS, FedEx or UPS. Now, you can get your packages delivered with the best cost and delivery options available.

With the receiving application, you can accurately log all of your incoming packages' information so that you have an accurate history of every package that has been delivered to your office.

For more information, visit us online: **AutomatedCopySystems.com**

## Desktop shipping.

The SendPro™ P1000 enables users outside the mail area to ship packages from their individual PCs. Office workers simply log in to ship—without having to leave their desk to send or track a package delivery. The optional SendKits featuring a scale and label printer, allow your office staff to weigh, rate and print professional shipping labels. No matter how many people in your office ship, equip them with desktop capabilities.

## Manage inbound deliveries.

Automate and streamline the receipt and management of incoming packages using your P1000 and its integrated barcode scanner. The P1000 instantly logs package information, including carrier, recipient, sender, tracking number and date and time of receipt, keeping a history report of all your incoming packages. You will then know when each and every package was delivered. You can also have the option to automatically alert the intended recipient with email notifications, making the entire process more accurate and efficient.

## Simple user display.

The modern, color touch screen display of the P1000 enables anyone in your office to pick the ideal service and complete each job quickly and accurately. The system guides the user with its easy-to-follow menus for processing mail and shipments with each of the three carriers: USPS®, FedEx® and UPS®.
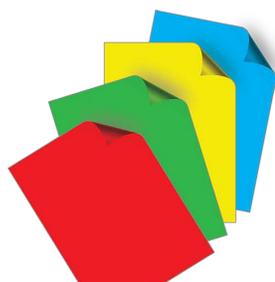

## Flexible printing.

The P1000 also gives you unique control over envelope printing. From any desktop PC, you can upload your graphics, enabling the P1000 print a business logo, return address, or promotional message in full color on outbound envelopes. Print just one or print a thousand. The savings add up. It's quick changeover gives you printing flexibility and can eliminate the premiums you pay for special envelope stock.
