

The NYRC facility allows participants the opportunity to enjoy outside private, controlled activities while following the increased safety steps established by NYRC.

- 100% managed and controlled social distancing policy
- hand washing stations at all locations
- Masks will be worn by EVERYONE entering NYRC, or made available by NYRC
- Dedicated staff to clean and maintain touch spots and areas
- maintain strict required 100% compliant 6ft social distancing policies
- cleaning and disinfecting facilities
- Limit of one person per kart
- Any inside activities will follow the directive of state of NJ government guideline and timeline
- All required meetings to take place outside following social distancing policy and not inside buildings
- All staff and security staff to drive separately in individual vehicles
- Safety and emergency workers will adhere to 6ft social distancing policy • Facility restrooms will be maintained and cleaned regularly

New York Race Complex LLC is committed to providing a safe, healthy, and productive work and activity environment, it is the intent of the company to share steps we are taking to protect the health and well-being of NYRC staff and guests

NYRC is closely tracking guidance from the centers for disease control (CDC), World health organization (WHO) and local/state health departments

Our team has established internal recourses, as well as action plans to further enhance our existing cleaning, sanitation, and safety protocols. This includes but is not limited to: significantly increasing the amount that we sanitize our "high touch areas" such as, tables, karts, helmets, and common touch areas.

Safety has always been, and will continue to be, our top priority. During the midst of this coronavirus outbreak, our team has taken significant additional measures to ensure that the safety of our team members and guests remain uninterrupted.

Practices exclude but are not limited to:

- facilities within the park are cleaned/sanitized daily
- Carefully monitoring out cleaning inventory and supplies to endure teams have what they need
- Soap and hand sanitizers are located throughout the park and are available to all staff and guests
- Staff who have symptoms of illness are required to stay home

Required key precautions for all staff and guests:

- Social distancing (keep a safe distance from others)
- Hand hygiene (washing hands for at least 20 seconds with soap and water)
- Daily environment cleaning using household disinfectants
- Avoid spreading respiratory droplets, coughing/sneezing into a reusable tissue or inner elbow

Covid standards and procedures

General

- Only employees allowed on property are those essential to administering the event
- At no time or place may people gather in large groups
- All groups should stay on property if possible
- All members must maintain a minimum of 6ft social distancing
- All required meetings or gatherings require 6ft social distancing
- Drivers meetings can be held over the PA system
- As an employee if you do not feel comfortable being at work or around others then please advise
- If anyone is observed as violating these standards please ask them nicely to comply with CDC guidelines and posted signage
- No one - including employees and event members - Who has experienced any of the following symptoms at any time during the 14 days preceding the event, may enter the property fever, cough, shortness of breath, persistent pain or pressure in chest, Confusion, or bluish lips or face. any employee who is or has experienced any of the above symptoms must notify his or her supervisor immediately. Anyone who begins experiencing any of the above symptoms during an event must leave the facility immediately.

Practice the following safeguards is recommended by the CDC:

- Wash your hands often with soap and water for at least 20 seconds. Use hand sanitizer with at least 60% alcohol if soap and water are not available
- Clean and disinfect frequently touch the objects and surfaces such as workstations, keyboards, telephones, handrails, and door knobs. Dirty surfaces can be cleaned with soap and water prior to disinfection. To disinfect, use products that meet EPA's criteria for use against Sars-Cov2

Security Gate

- security will work directly with the participants to establish who is critical to the event. Once that list is established then anyone not on that list will not be allowed to enter the property.
- Staff will work with gate making to ensure those that are on property are either on the list or required to be here
- Anyone working the gate will wear gloves for all interactions with signing the waiver and or mask if they feel that that is needed.
- NYRC is closed to the public and is only excepting private groups and their guests.
-

Emergency Services

- Windows to remain down in the trucks as best as possible
- People indoors need to maintain 6 foot spacing
- Clean the radios that were used at the end of the day
- clean all vehicle surfaces used at the end of the day
- cleaning supplies will be provided regularly to wash down surfaces
- notify management if anyone is complaining or showing any symptoms associated with COVID-19

Track renter private group Acknowledgment

- only employees or crew allowed on property or those essential to administering the event.
- All participants must maintain a minimum of a 6-foot social distancing.
- All required meetings or gatherings to be held following 6-foot social distancing policy.
- No one – including any employee or event member – who has experience any of the following symptoms at any time during the 14 days preceding the event, or who is a household member, intimate partner or caregiver of anyone who has experienced these symptoms may enter the property: fever, cough, shortness of breath, persistent pain or pressure in chest, confusion, or bluish lips or face.

Any renter or crew member who has experienced any of the above symptoms must notify NYRC immediately. Anyone who begins experiencing any of above symptoms during an event must leave the facility immediately.

Cleaning And Disinfecting Your Facility

Everyday Steps, Steps When Someone is Sick, and Considerations for Employers

How to clean and disinfect

Wear disposable gloves to clean and disinfect.

Clean

- **Clean surfaces using soap and water.** Practice routine cleaning of frequently touched surfaces.

High touch surfaces include:

Tables, doorknobs, light switches, countertops, handles, desks, phones, keyboards, toilets, faucets, sinks, etc.

Disinfect

- Clean the area or item with soap and water or another detergent if it is dirty. Then, use a household disinfectant.
- **Recommend use of EPA-registered household disinfectant.** **Follow the instructions on the label** to ensure safe and effective use of the product.

Many products recommend:

- Keeping surface wet for a period of time (see product label)
- Precautions such as wearing gloves and making sure you have good ventilation during use of the product.

- **Diluted household bleach solutions may also be used** if appropriate for the surface. Check to ensure the product is not past its expiration date. Unexpired household bleach will be effective against coronaviruses when properly diluted.

Follow manufacturer's instructions for application and proper ventilation. Never mix household bleach with ammonia or any other cleanser.

Leave solution on the surface for **at least 1 minute**

To make a bleach solution, mix:

- 5 tablespoons (1/3rd cup) bleach per gallon of water

OR

- 4 teaspoons bleach per quart of water

- **Alcohol solutions with at least 70% alcohol.**

Soft surfaces

For soft surfaces such as **carpeted floor, rugs, and drapes**

- **Clean the surface using soap and water** or with cleaners appropriate for use on these surfaces.

CS3162488 04/01/2020

cdc.gov/coronavirus

- **Laundry items** (if possible) according to the manufacturer's instructions. Use the warmest appropriate water setting and dry items completely.

OR

- **Disinfect with an EPA-registered household disinfectant.** [These disinfectants](#) meet EPA's criteria for use against COVID-19.

Electronics

- For electronics, such as **tablets, touch screens, keyboards, remote controls, and ATM machines**
- Consider putting a **wipeable** cover on electronics.
- **Follow manufacturer's instruction** for cleaning and disinfecting.
 - If no guidance, **use alcohol-based wipes or sprays containing at least 70% alcohol.** Dry surface thoroughly.

Laundry

For clothing, towels, linens and other items

- **Wear disposable gloves.**
- **Wash hands with soap and water** as soon as you remove the gloves.
- **Do not shake** dirty laundry.
- Launder items according to the manufacturer's instructions. Use the **warmest appropriate water setting** and dry items completely.
- Dirty laundry from a sick person **can be washed with other people's items.**
- Clean and **disinfect clothes hampers** according to guidance above for surfaces.

Cleaning and disinfecting your building or facility if someone is sick

- **Close off areas** used by the sick person.
- **Open outside doors and windows** to increase air circulation in the area. **Wait 24 hours** before you clean or disinfect. If 24 hours is not feasible, wait as long as possible.
- Clean and disinfect **all areas used by the sick person**, such as offices, bathrooms, common areas, shared electronic equipment like tablets, touch screens, keyboards, remote controls, and ATM machines.
- If **more than 7 days** since the sick person visited or used the facility, additional cleaning and disinfection is not necessary.
 - Continue routine cleaning and disinfection.

When cleaning

- **Wear disposable gloves and gowns for all tasks in the cleaning process, including handling trash.**
 - Additional personal protective equipment (PPE) might be required based on the cleaning/disinfectant products being used and whether there is a risk of splash.
 - Gloves and gowns should be removed carefully to avoid contamination of the wearer and the surrounding area.
- **Wash your hands often** with soap and water for 20 seconds.
 - Always wash immediately after removing gloves and after contact with a sick person.

- Hand sanitizer: If soap and water are not available and hands are not visibly dirty, an alcohol-based hand sanitizer that contains at least 60% alcohol may be used. However, if hands are visibly dirty, always wash hands with soap and water.

- **Additional key times to wash hands** include:

- After blowing one's nose, coughing, or sneezing.
- After using the restroom.
- Before eating or preparing food.
- After contact with animals or pets.
- Before and after providing routine care for another person who needs assistance (e.g., a child).

Additional Considerations for Employers

- **Educate workers** performing cleaning, laundry, and trash pick-up to recognize the symptoms of COVID-19.
- Provide instructions **on what to do if they develop symptoms within 14 days** after their last possible exposure to the virus.
- Develop **policies for worker protection and provide training** to all cleaning staff on site prior to providing cleaning tasks.
 - Training should include when to use PPE, what PPE is necessary, how to properly don (put on), use, and doff (take off) PPE, and how to properly dispose of PPE.
- Ensure workers are **trained on the hazards of the cleaning chemicals** used in the workplace in accordance with OSHA's Hazard Communication standard ([29 CFR 1910.1200](#)).
- **Comply** with OSHA's standards on Bloodborne Pathogens ([29 CFR 1910.1030](#)), including proper disposal of regulated waste, and PPE ([29 CFR 1910.132](#)).

For facilities that house people overnight:

- Follow CDC's guidance for [colleges and universities](#). Work with state and local health officials to determine the best way to isolate people who are sick and if temporary housing is needed.
- For guidance on cleaning and disinfecting a sick person's bedroom/bathroom, review CDC's guidance on [disinfecting your home if someone is sick](#).

NOTICE
