

Date: 05-19-22

To: Our Valued Customer

Ref: Congestion, Repositioning, Security, and Overtime Fee

To our valued business partners,

As the current global supply chain environment continues to encounter a variety of unknown and uncontrollable variables, Omni, as we all do, continues to re-evaluate the efficient and effective operation of our over-all business.

Our previous efforts to track and invoice some of the variables were targeted toward warehouse congestion, re-positioning of containers from staging positions to unloading doors, security coverage, and overtime, all at a transactional level.

Moving forward, all of the above referenced items, in addition to enhanced container receiving documentation, will be invoiced to all containers processed at Omni under the FOT model.

Effective June 1, 2022, each container will receive an additional \$100 charge as a "Congestion, re-positioning, security, and overtime" fee.

This \$100 charge will apply to all containers received at any Omni facility on 06-01-22, or later.

Your continued business is appreciated.

Sincerely,

Omni Transloading and Logistics
