

## PRODUCT DATA SHEETS

### BATTERY ACID CLEANING WIPES

#### DESCRIPTION

**Battery Acid Cleaning Wipes** will clean corrosion and other contaminants from battery terminals. The color indicator changes from blue to pink in the presence of acid and it then turns back to blue once the acid is neutralized. These wipes leave a clean, protective barrier on the terminals and contact areas.

#### FEATURES

- **DOES NOT CAUSE FOAMING ACTION**
- **NEUTRALIZES BATTERY ACID INSTANTLY**
- **EASY TO USE**
- **QUICKLY REMOVES CORROSION AND OXIDATION FROM BATTERY POSTS**

#### USE AND DIRECTIONS

Wipe the surface of the battery post, removing the deposits. The blue wipe will turn pink in the presence of the acidic corrosion. Continue scrubbing the area until the wipe turns back to its original blue color. This will indicate that the corrosion has been neutralized.
