

Heisley Park HOA Nomination Form:

Name: Jennifer R. Kalin

Address:

Phone:

Email:

Please list two or three positives that you have found in Heisley Park.

1. The community atmosphere, it looks and feels like a neighborhood where you want to raise a family.
2. The people. The people are great. When we started this process (to move into Heisley Park) we thought that this would be our 5 year home. After living here, for not even a year, we have changed that to "if we can't build another home in here then we will just stay in our current home."

Please list two or three initiatives that you would like to see the board accomplish during your tenure.

1. I like to enhance that sense of community, more common areas (like the new community space off of Spruce) would be something I would be interested in developing.
2. Investigating how we can make use of our money. Not that the funds are not being spent well now, but maybe there are things that we can do that will get us a bigger bang for our buck.
3. Since the recent events in the neighborhood and some other things that I have heard from my neighbors, maybe implementing a security system of some kind. Maybe this can be cameras at the entrance, safety training for residents, what to do when something occurs, etc...

Please give a one or two paragraph biography about yourself. Include education, occupation, board memberships, other service positions, pertinent training and awards.

I am a 36 year old mother and wife, I am originally from Pennsylvania where I began my collegiate career at Penn State University and then moved to Ohio in 2000 to finish my education at Kent State University where I obtained two degrees (BS and

BSA) in Architecture. I currently work for an engineering firm as an Architect and Project Manager.

I am involved in my daughter's school as a PTA member and member of several committees and I am a member of WiM, Women in Manufacturer. I am also involved in a lot of fundraising for various charities and organization throughout Northeast Ohio and participate in some as well.

List any additional information that residents might find beneficial in making a good decision.

I feel that my background and my occupation may lend itself well to some of the challenges that the HOA may face. I can apply my experiences to help Heisley Park continue to be one the most covenanted neighborhoods in Painesville. With the new community space being incorporated, I feel that having a design professional on the board may help residents to understand why certain things are being done or why certain decisions were made etc... I help clients understand a design and process every day, and the residents are a version of a client.
