- 24] Bruce Smoller
- 25] Marilou Guerson Tablang-Jimenez
- 26] Terry Teplitz
- 27] Robyn Wechsler
- 28] Albert A. Zachik

There has been a lot of discussion about how much time practitioners are having to spend on paper/computer work to where many are saying such time exceeds the time spent with patients. Last night I was talking with someone who was known, even during his residency at Saint Es, for being able to get to the core of clinical issues and keep the unessentials to a minimum. He said that he takes all insurances and by using Office Ally, only has to spend about 3 minutes documenting visit of an established patient and about 6 minutes documenting the visit of a new patient. Office Ally is free. If anyone else has an experience with Office Ally, I would be interested in hearing about it.

Roger
