

# GIRLS ONLY CLUB

Pennypickle's Workshop is dedicated to helping kids discover science through play, and we especially want to encourage girls to develop a love for science and the world around them. The Girls Only Club focuses on fun, wholesome activities and experiments to get girls interested in science while enjoying some of their favorite interests. Please make these events even more fun for your girl by letting her dress up, bring her dolls or stuffed animals, and talking to her about the great time she had!

**DROP-OFF; EARLY PRE-REGISTRATION REQUIRED AS SPACE IS LIMITED TO 20 GIRLS EACH SESSION;  
CALL 951-308-6376 TO PRE-REGISTER**

## MONDAY, JUNE 5, 10-12 OR 12:30-2:30 STUFFED ANIMAL SCIENCE

Bring your favorite stuffed animal and let's have some fun! We'll be checking out their health like a real veterinarian and making sure their habitats are comfortable and cuddly.

## MONDAY, JUNE 12, 10-12 OR 12:30-2:30 GIRLS IN SPACE

You and your favorite doll (or stuffed animal) will explore the galaxy when we make out of this world discoveries... we promise you won't get "lost in space" but you WILL have some cool adventures to brag about to your friends!

## MONDAY, JUNE 19, 10-12 OR 12:30-2:30 BFF SCIENTIFIC SPA SECRETS

It's a Best Friends Forever kind of day when we mess around with girly spa and beauty stuff and turn it into SCIENCE! Bring your BFF to partner with you so you can have a great time together. (1/2 off fee for friend who signs up at the same time as registrant - this event only.)

## MONDAY, JULY 10, 10-12 OR 12:30-2:30 BARBIE CAREERS

With more than 150 careers on her resume- from registered nurse to rock star, veterinarian to aerobics instructor, pilot to police officer- Barbie shows girls that they can do anything. We're going to play-act some of those neat jobs (Paleontologist? Architect? Scientist?), so bring your Barbie and be prepared to have some fun!

## MONDAY, AUGUST 7, 10-12 OR 12:30-2:30 MINI MAKER FEST

When planning Beaker's Little Birthday Bash on Sunday, Aug. 6, he suggested that his friends should make some cool mini objects that are perfect for someone his nano-size, so that's what we'll do! He thinks HE is going to keep everything... but NOOOO! The fun teeny stuff that you make will go home with you so you and your dolls can play.

## MONDAY, AUGUST 14, 10-12 OR 12:30-2:30 SHIMMERY SCIENCE

It's all about the glitter, girls!! Shiny rainbow colored science is what we like, and we know you do, too. These experiments may get messy (we're hoping). You may want to wear your lab coat.
