

60 SX

60 MX

60 LX

- Highest performance 60 GHz radio on the market.
- Choice of 3 high performance antennas.
- Advanced “Lens” antenna, superior to previous generation flat panel antennas.
- 2 Gbps aggregated LAN throughput (link capacity).
- Up to +55 dBm max EIRP, compared to competitors’ 42 dBm, provides higher reliability & longer distance.

### Point-to-Point Connectivity

Operational range between  
25 m (~80 feet) and 1850 m (~1.15 mile)

## Next Generation 60 GHz Point-to-Point Radios

LightPointe’s AireLink wireless bridges set a new benchmark in 60 GHz technology for building-to-building connectivity. Based on over two years of research and development, these backhaul radios are the most affordable, advanced 60 GHz radios available and include a choice of three antennas capable of the highest performance in the industry. Our innovative high gain Lens antenna is so advanced it “acts” like a much larger antenna, outperforming previous generation flat antennas.

Whether connecting two buildings in a business or school campus, or providing small cell backhaul in an architecturally sensitive historic district, these radios will provide years of reliable service while avoiding monthly leased line costs. And best of all, 60 GHz is license free in most countries—so your organization can install these radios quickly and without annual regulatory fees.

### Enterprise & Carrier Applications

- Fiber-like long distance building connectivity for schools, businesses, government buildings and hospitals—without trenching/installing fiber or the recurring costs of leased-line alternatives.
- 4G/LTE macro and small cell mobile backhaul.
- Disaster recovery/emergency communications restoration.
- Digital video and video surveillance connectivity.
- Remote storage access.
- Local Area Network extension.
- Military theater of operations and base connectivity.

### Advanced Features

- High speed full-duplex 1 Gbps with low latency (<40 μs).
- Flexible connections, PoE, and helpful LED indicators.
- Robust data transmission using industry leading 9 levels of Adaptive Coding and Modulation (ACM), automatic or user selectable.
- High transmission security and interference resistance.
- Choice of fiber optic or copper interfaces.
- Unparalleled ease of installation, alignment, & operation.
- Transmission power control for short distance deployments.
- Redundant power supplies.
- Compact & aesthetic design for sensitive installations.
- Innovative small footprint ultra high gain Lens Antenna with the industry’s best in class side lobe suppression & superior performance when compared to flat panel antennas (60 SX).

Industry-leading  
2-year warranty

## AireLink 60 SX

(4.72" / 12cm Lens Antenna)

Up to ~1/2 mile (800 m)

## AireLink 60 MX

(1' foot / 30cm Antenna)

Up to ~1 mile (1600 m)

## AireLink 60 LX

(2' foot / 60cm Antenna)

Up to ~1.15 mile (1850 m)
