

LATERAL SERVICES LINE POLICY

Policy No. 3

Date Passed: February 2, 2009

PURPOSE: To establish Commission costs and Commission Member costs when a second lateral transmission line is installed.

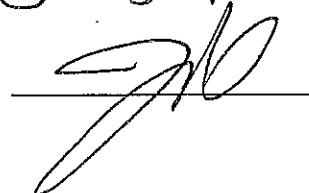

Commission Responsibilities:

1. All costs of the Commission transmission line to the property line of the member's municipality reservoir or designated reservoir be the Commission's responsibility.
2. Flushing hydrant and valve to property line is the responsibility of the Commission.
3. Instrumentation and control of the regional system for valve operation and monitoring of level of reservoir be the Commission's responsibility.
4. Meter in pump house and piping for water be responsibility of Commission.
5. The Commission will be responsible for 1 km of lateral transmission pipe from the main transmission line.
6. The Commission would be responsible for 2 lateral service lines, from the main line for each member community.

Member's Responsibilities

1. Member municipality must submit their request for a second lateral line, in writing, prior to construction. If there is no approval the member will be responsible for all costs.
2. Member municipality will submit project costs and estimates to the Commission.
3. All grants for project will be cost shared with the Commission.
