

Preventative & Corrective Facial Therapies

No one's skin is the same. Genetics, lifestyle choices & the elements all impact the skins overall health. So it makes sense to receive a customized treatment plan as well as a home care protocol to address concerns such as acne, fine lines, hyperpigmentation, dry, dehydrated, rosacea or sensitive/sensitized skin. Treatments & results are progressive. Facial treatments relax the muscles, stimulate blood & lymph circulation, increase oxygen to the tissue, improve muscle tone & refine texture. Treatments are recommended every four weeks; more frequently for corrective concerns. Consultations are complimentary.

45min \$85

Double cleansing, steam, **enzyme & ultrasonic exfoliation**, treatment serum, European facial massage; neck, shoulder & scalp massage, heated hand treatment, customized mask. No extractions. Teens include extraction but no neck/shoulder massage.

60min \$120

Double cleanse, **chemical exfoliation, extractions & high frequency** if needed, vitamin infusion to treat concern using **iontophoresis or sonophoresis, acupressure & European facial massage**, neck, shoulder & scalp massage, heated hand treatment & customized mask.

60min \$160

+\$85 Lash Lift +60min

- *For the best results, preconditioning of the skin four to six weeks prior to treatment is recommended.*
- *Refrain from waxing, electrolysis & use of vitamin A, AHA based or bleaching products 72 hours pre/post appointment.*
- *Clients should avoid excessive heat, exercise, chlorine & sun exposure 6 hours pre/post treatment.*
- *Daily use of SPF 30 is recommended.*
- *Please do not schedule an appointment within 14 days of fillers/botox injections, 8 weeks post-op cosmetic surgery.*

Contraindications: +pregnancy, cardiac conditions, epilepsy, metal implants, braces; *broken capillaries, rosacea; ^taking photosensitive herbs/medications; all clients undergoing medical treatment must have written consent from their physician before beginning treatment

Ultrasonic Exfoliation a gentle skin cleansing procedure using ultrasonic waves & high-frequency vibration to remove dead skin cells removal & rejuvenate the skin.

Enzyme or Chemical Exfoliation breaks down the "glue" that holds dead, dulling skin cells together. Enzyme exfoliation gentler than chemical exfoliation to shed skin cells & speed up the skin's natural exfoliation process. *Fall favorite*

High Frequency+* a thermal electrical stimulation of the skin characterized by a high rate of oscillation to help treat & prevent acne, shrink enlarged pores, reduce the appearance of fine lines & wrinkles, decongest puffy eyes & fade dark eye circles by enhancing circulation to eliminate toxins & encourage lymphatic drainage.

Iontophoresis/Sonophoresis+ a noninvasive method of transporting a high concentration of vitamins transdermally to increase product absorption promoting cellular renewal & repair, increases circulation & encourages lymphatic drainage.

Acupressure Stimulates & improves blood circulation & metabolism in the skin.

LED light therapy mask^ uses specific wavelengths to activate cellular metabolism, stimulate fibroblasts & promote circulation. **Red** stimulates collagen & elastin production to counteract the signs of aging. **Blue** kills acne-causing bacteria (up to 80% to be exact), which results in the prevention & elimination of breakouts. **Green** targets melanocytes, melanin-producing cells, to help fade & control hyperpigmentation.

Mechanical exfoliation* high pressure particles & suction (**microdermabrasion**) to safely remove cellular build up & refine the texture of the skin. Superficial cells are stimulated to build collagen. *Spring favorite*

CIT* (Collagen Induction Therapy/ZenPen) one of the best non-ablative, restorative, antiaging treatment available. An alternative to Fraxel, Botox & fillers to rejuvenate the skin. Micro-channels are created in the epidermis & product is penetrated to restore tightness/thickness, speeds up the reduction of pigmented marks, smooths fine lines & softens scars. *Summer favorite*

Microphototherapy+^ MPT works deep under the skin with light energy to help clear mild to moderate acne & pigmented lesions, improve skin tone & texture. Infrared light triggers a mild dermal trauma initiating a wound/heal response. Collagen found in these levels responds with new growth, returning firmness & elasticity.

Draining Massage increases circulation, encourages lymphatic drainage to remove inflammation & toxins to help clarify the complexion & rejuvenate cells.

Microcurrent+ gentle electronic stimulation strengthens musculature while firming & lifting. Improves blood & lymph circulation, stimulates ATP & muscle memory. Increases fibroblast activity, upregulates collagen & elastin production. Indicated for generalized aging, lax skin, fine lines & deep wrinkles.

Oxygen Therapy O2 infuses vitamins, peptides & hyaluronic acid to improve lymph & blood circulation & stimulate ATP. Revitalize dull, dehydrated skin. Wonderful for the winter.
