

Pediatric Mobility Solutions

Length: 1 Hour

Description:

The purpose of this course is to define mobility development in children as well as the various mobility related assistive devices to facilitate pediatric ambulation. We will also explore the different mobility devices that are available, the primary sources of equipment funding and the letters of medical necessity that are required.

Instructional Level: Intermediate

Presenter:

Wayne Allen

Wayne Allen is currently the Vice President of the South Central Region for Inspired by Drive, representing a diverse line of specialized pediatric rehab equipment. He has worked in the rehab industry for the past 10 years and has a passion for working with children. He became an ATP in 2011 and worked in the Dallas-Fort Worth area until 2018. During that time he specialized in pediatric mobility including alternative power systems, custom manual wheelchairs and specialty strollers. He was a rehab technician for 3 years prior to becoming an ATP.
